

THE FEI'S « DOCTOR'S PACK »

Introductory note:

The "Doctor's Pack" zip file contains documents which are essential when providing medical care at FEI competitions. In addition, medical care providers may need plans or maps of the venue and details (including telephone numbers) of local hospital and emergency services. Radio and mobile telephone must be checked before the start of the competition.

Medical providers should be familiar with the rules of the sport, which include the [FEI General Regulations](#), [FEI Anti-Doping Rules for Human Athletes](#) as well as any discipline-specific rules regarding athlete care. These rules are available on the FEI's website.

Please use the injury report forms and return them to the Technical Delegate or Foreign Judge at the end of the competition. Some FEI Disciplines have their own report forms, which must be completed for the Technical Delegate or Foreign Judge at the event to send to the relevant Discipline department at the FEI Headquarters.

All medical providers must be familiar with the concussion information contained in this pack as well as the "Concussion Information for Health Care Providers" information published on the FEI's website at <http://www.fei.org/fei/your-role/medical-officer/concussion>.
