## **FEI Equine Prohibited Substances List and Database**

Dear Visitor,

The intention of the **FEI Prohibited Substance List** is to ensure that the performance of horses competing under the FEI Rules is not enhanced by Prohibited Substances, and consequently, to ensure fair play in competition and to maintain the welfare of the horse. [Read more ...](#)

The **FEI Equine Prohibited Substances Database** is a tool designed to help you identify which substances are prohibited under FEI regulations. The database provides information such as substance definition, common usage and common trade names are available. Read more and access the database by clicking on the button below:
