

## List of the applicable international testing standards for Protective Headgear

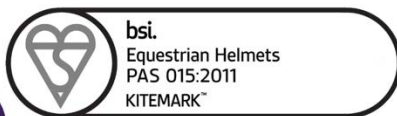

“Protective headgear” is defined in the FEI General Regulations as “appropriate helmet or headgear that is in compliance with the applicable international testing standards”, with reference to the present list.

**Protective Headgear must comply with one (or more) of the international testing standards listed below. They must also have passed quality control. The accepted standards and quality control labels are indicated below.**

- **Accepted international testing standards:**

- British standard PAS 015 (1998 and any subsequent updates)
- CE-marked equestrian protective headgear
- Australian standard AS/NZ 3838 (2006 and any subsequent updates)
- Australian standard ARB HS 2012
- American ASTM F1163: 2004a and any subsequent updates

- **Accepted quality control labels:**

A Subsidiary of  
ASTM INTERNATIONAL

**The products complying with the above are marked and labelled accordingly.**

**Note:** this list is a living document which will be updated regularly. Please contact the FEI for any questions. Last update: 23 May 2019.
