2.	RULES IMPLEMENTATION
	The proposed modifications to the 2024 FEI Endurance Rules have been used on field for nearly a year now and they are working well. Our main consideration was maintaining Horse Welfare and ensuring the smooth running of Competitions for all Endurance stakeholders.
3.	NEW RANKING LIST

	A new way of calculating the Ranking Lists was put in place in 2024 to allow a more accurate ranking of Endurance Riders and Combinations around the world. At the end of this year, we will see the results of this new Ranking calculation.
4.	VET GATE WORKING GROUP
	A Vet-Endurance Working Group with various top FEI equine veterinarians was created in 2023 to focus on improving the effectiveness of veterinary inspections to identify early signs of metabolic problems and to investigate evidence to support future rule changes. Work is underway.
5.	HYPOSENSITIVITY TEST
	The Hyposensitivity Control Teams, under the direction of the FEI Veterinary Department, tested horses in various Endurance competitions on different continents at 16 venues. A total of 1205 horses were tested and 6 (0,5 %) did not pass and were Disqualified. The testing was also used at all the FEI Endurance Championships. Endurance stakeholders are now familiar with this new testing procedure, and we receive very positive feedback.
6.	CLOSING REMARKS
	I would like to thank the FEI HQ and especially the FEI Endurance Department and the members of the FEI Endurance Committee for their hard work and their contribution and continuous support throughout the year. A special thank you to Sarah Coombs (Deputy Chair) and Daniel Fenaux, who are finishing their terms at the Endurance Technical Committee, for their contributions.
