

# Model of a National Education System for Officials in Equestrian Sports

## Education:

The below table is an example of a NATIONAL system to:

- A. EDUCATE
- B. CERTIFY

national Officials in National Federations without a system.

This model is based on the minimum requirements and may need adjustment per Discipline and/or per NF to match to each situation.

## Certification:

It is up to the NF without a system to use the below model for its own purpose and to create the education material and the certification system (exams) linked to it. In this case, Certificates of Achievement/Competence linked to a technical level should be delivered.

For NFs with a national Education & Certification system, ESEEs can also be used as refreshers and in this case only Certificate of Attendance should be delivered, regardless the number of ESEEs attended.

NB: No **FEI** Certification can be delivered at ESEEs. This is national education!

## System:
