1. Introduction

Further to the update of the FEI IT system, it is possible to send the FEI the results in an **Excel file** allowing us to import directly in **XML format**. This procedure will hopefully simplify and speed up procedures for the OC, NF and FEI and will furthermore allow the results to be processed more efficiently to the benefit of all involved.

Please find below the description, information and explanations of the result files required in order to correctly and swiftly upload them into the FEI database. An example of a results file is attached to the end of this document.

- Please include Cross Country or Jumping Obstacle penalties for a combination having Retired or been Eliminated during that phase. If no Obstacle penalties were awarded, please indicate "0"
- If a combination is Eliminated for refusals during the Cross Country or Jumping phase, please do not include the eliminatory penalty in the total Obstacle penalty scores. If for example a combination is eliminated for 3 refusals at the same obstacle, only the first two refusals will be taken into account for the scoring, i.e. 60 penalty points plus any additional penalty points awarded on course prior to Elimination.
- Please do not exchange columns in the excel score sheet for a short format competition.

We strongly encourage you to carefully check that the results are accurate (correct code of elimination, correct Horses and Athletes IDs, all athletes included) as results cannot be modified once validated. The points below should be checked carefully:

- Missing combinations: please ensure that all combinations listed in the Fence Analysis are listed in the results and vice-versa.
- Accuracy between Horse/Athlete IDs and names: please ensure that all IDs correspond to the correct Horse/Athlete.
- Accuracy of codes: please ensure that all codes are accurate and consistent between results, fence analysis, and fall report forms. Examples of possible inconsistencies to look out for:
 - Eliminated for refusals is listed in the results but a fall report was filled out.
 - Fall of Rider is listed in the results but the fall report states Fall of Horse.

The Eventing Department has been asking for the **fence analysis** to be sent to the FEI for each competition, for data reporting and Risk Management purposes. Please ensure to provide the fence analysis **together with the results of the Event** to allow the FEI to cross-check the information provided.

Please make sure that the following elements are accurately reported in the Fence Analysis:

- Names of Athletes and horses to be used rather than start (bib) numbers
- Please list all athletes having had faults on the Cross Country course and indicate on which fence the combination had a fault
- All elements of a combination (i.e. 5A, 5B, 5C, etc.) must be listed

2. Detail of <Indiv>

The **Individual** tab of the excel file contains a set of elements in regard to the combination (Athlete/Horse) such as IDs and Names as well as their results.
