

Protocol for use of NF cameras in stables – WEG 2018 29/06/2018

In accordance with FEI Veterinary Regulation Art. 1008.15, National Federations (NFs) are permitted to install and use their own camera monitoring systems within the event stables area:

"Athletes and/or NFs are permitted to install and use their own camera monitoring systems within the Event stables area for the sole purpose of monitoring their horse(s), provided that they have submitted their request to the FEI for approval. Any such use of camera monitoring systems must comply with the FEI's protocol."

Use of such systems must be in accordance with the following conditions:

- Any cameras must be positioned to monitor only the NF's own horse/s and as such the privacy of all others must be respected
- The installation of such a system must not in any way compromise the welfare of any horse or safety of any personnel in the stables area
- Any such system must not interfere technically with, or compromise in any way the operation of CCTV or any communication or other system/network installed and/or being used by the FEI or the Organisers for the running of the event/competition
- Any resulting recorded footage must not be passed to any third party and must not be made available publicly, including on social media or any other web platform
- Any other conditions established and stated by the Organiser must be met (e.g. seeking authorisation for temporary use of radio frequency spectrum)
- Permission must be sought from and given by the FEI and Organisers, both of which reserve the right to decline a request for either not meeting or having potential not to meet any of the conditions stipulated above, or for any other reason which will be stated in the response

Any NF wishing to install and use a camera monitoring system in the event stables area must submit their request in writing to the FEI in the first instance at gameschampionships@fei.org. The request must include the following:

- Name of NF submitting the request
- Name and date of event at which the camera monitoring system will be installed
- Name and FEI horse registration number/s of horse/s for which the camera system will be used to monitor
- Summary of camera monitoring system, including number of cameras to be used, how and where they will be installed, how the system works technically, the camera specification (including size), and information regarding any supporting equipment to be installed/used
- Any power and internet requirements and how the NF envisages such requirements being fulfilled

Any request to install and use a camera monitoring system must be submitted to the FEI by 17/08/2018. The FEI will forward the request to the Organiser and their joint decision will be communicated to NFs.
