Should you need any further information and/or assistance, please do not hesitate to contact the person in charge directly.

2017 WADA LIST OF PROHIBITED SUBSTANCES AND METHODS

Human anti-doping – WADA publishes 2017 Prohibited list

The World Anti-Doping Agency (WADA) has just released the **2017 List of Prohibited Substances and Methods** along with the **2017 Summary of Major Modifications and Explanatory Notes**. The 2017 List - which designates what substances and methods are prohibited both in- and out-of-competition, and which substances are banned in particular sports - will come into force on **1 January 2017**.

We urge all Athletes to thoroughly check the status of any medication (prescribed and over-the-counter) they will be taking in 2017 according to the updated List. In case of doubt athletes should contact their **National Anti-Doping Agency (NADO)** or the **FEI**.

Where prescribed medication contains substances which are prohibited, athletes should apply to the FEI for a **TUE (Therapeutic Use Exemption)** and await the outcome of the application before starting the treatment.

For further information please contact **Catherine Bollon** at the FEI.

NB: The approval of the 2017 FEI Equine Prohibited Substances list was communicated in the FEI Update 18/2016 on 22 September 2016 and can be found on [Inside.FEI.org](#).

The FEI UPDATE and supporting documents are available on the [FEI UPDATE Library](#) on the FEI website.
