FIGURE DETAILS

MALE / FEMALE Gender Ratio

Provides the Male/ Female gender ratio across disciplines OR type of data (e.g. Participations, Registration...). It also contains the distinct number of female/male individuals broken down by gender. (% is Female Athletes)

MAP GENDER RATIO

Gives an overview of the ratio of women (pink) to men (blue) around the world.

AGE PYRAMID

Illustrates the age distribution broken down in Ages groups

INDIVIDUAL DISTRIBUTION

Shows the breakdown of individuals across Functions / Event Categories and levels. The colored blue and pink lines represent the average age of the individuals present in each cluster.

GROWTH

Illustrates the distinct number of individuals across time and breakdown by gender. The colored blue and pink lines represent the average age of the individuals present in each cluster. It also provides the female gender ratio and its growth in time.

OFFICIALS

In this section, all figures are based on the current situation of officials in each discipline. For clarity, vets have been separated and treated as a 'discipline'. Officials with 'open' and 'on hold' status are both included.

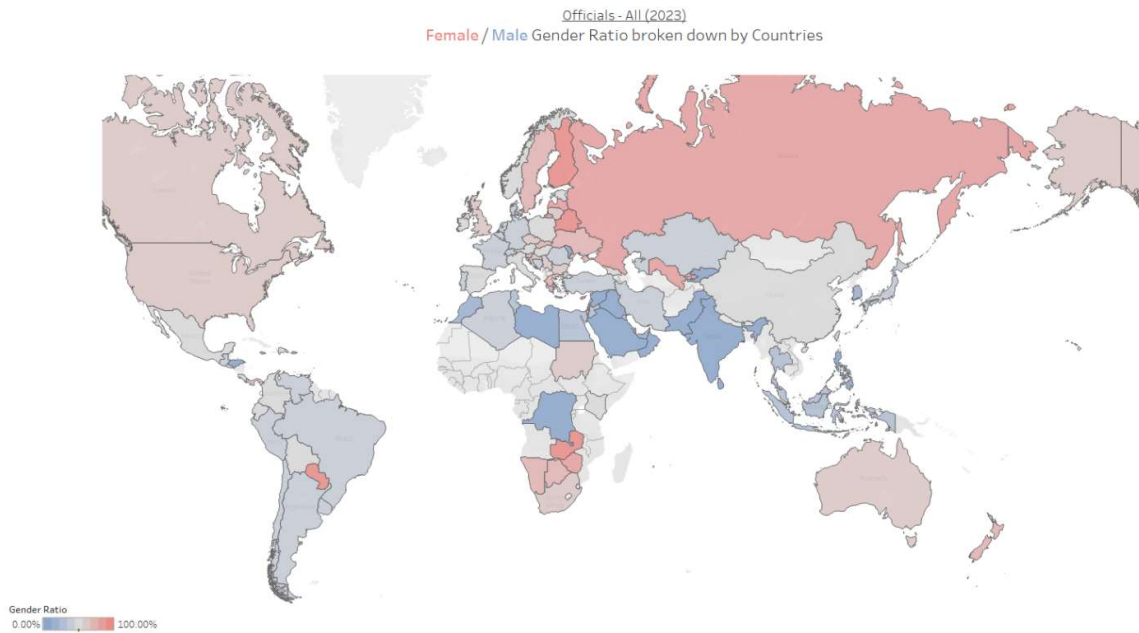

KEY INFORMATION

Today, the FEI has 4,800 Officials with an almost equal proportion between the genders. Their average age is 50 years. Women (avg age: 48 years) are slightly younger than men (avg age: 52 years). It is however not significant. The differences emerge more clearly when we examine the officials by discipline in greater detail and according to geographical location. In the southern hemisphere, male officials are indeed in the majority. Dressage, Vaulting as well as Para Dressage and Para Driving have, in contrast, a higher percentage of female officials (between 65% and 80% of officials are women). This gender gap in Officials corresponds to the gender representation at Athlete level (which will be discussed in the following sections). Thus, the disciplines of Jumping, Driving and Endurance unsurprisingly have more male than female Officials. Irrespective of discipline, the function of the Course Designer is the one in which women are least represented, with only 15%.

MALE / FEMALE GENDER RATIO of Officials split by discipline

ATHLETES

KEY INFORMATION

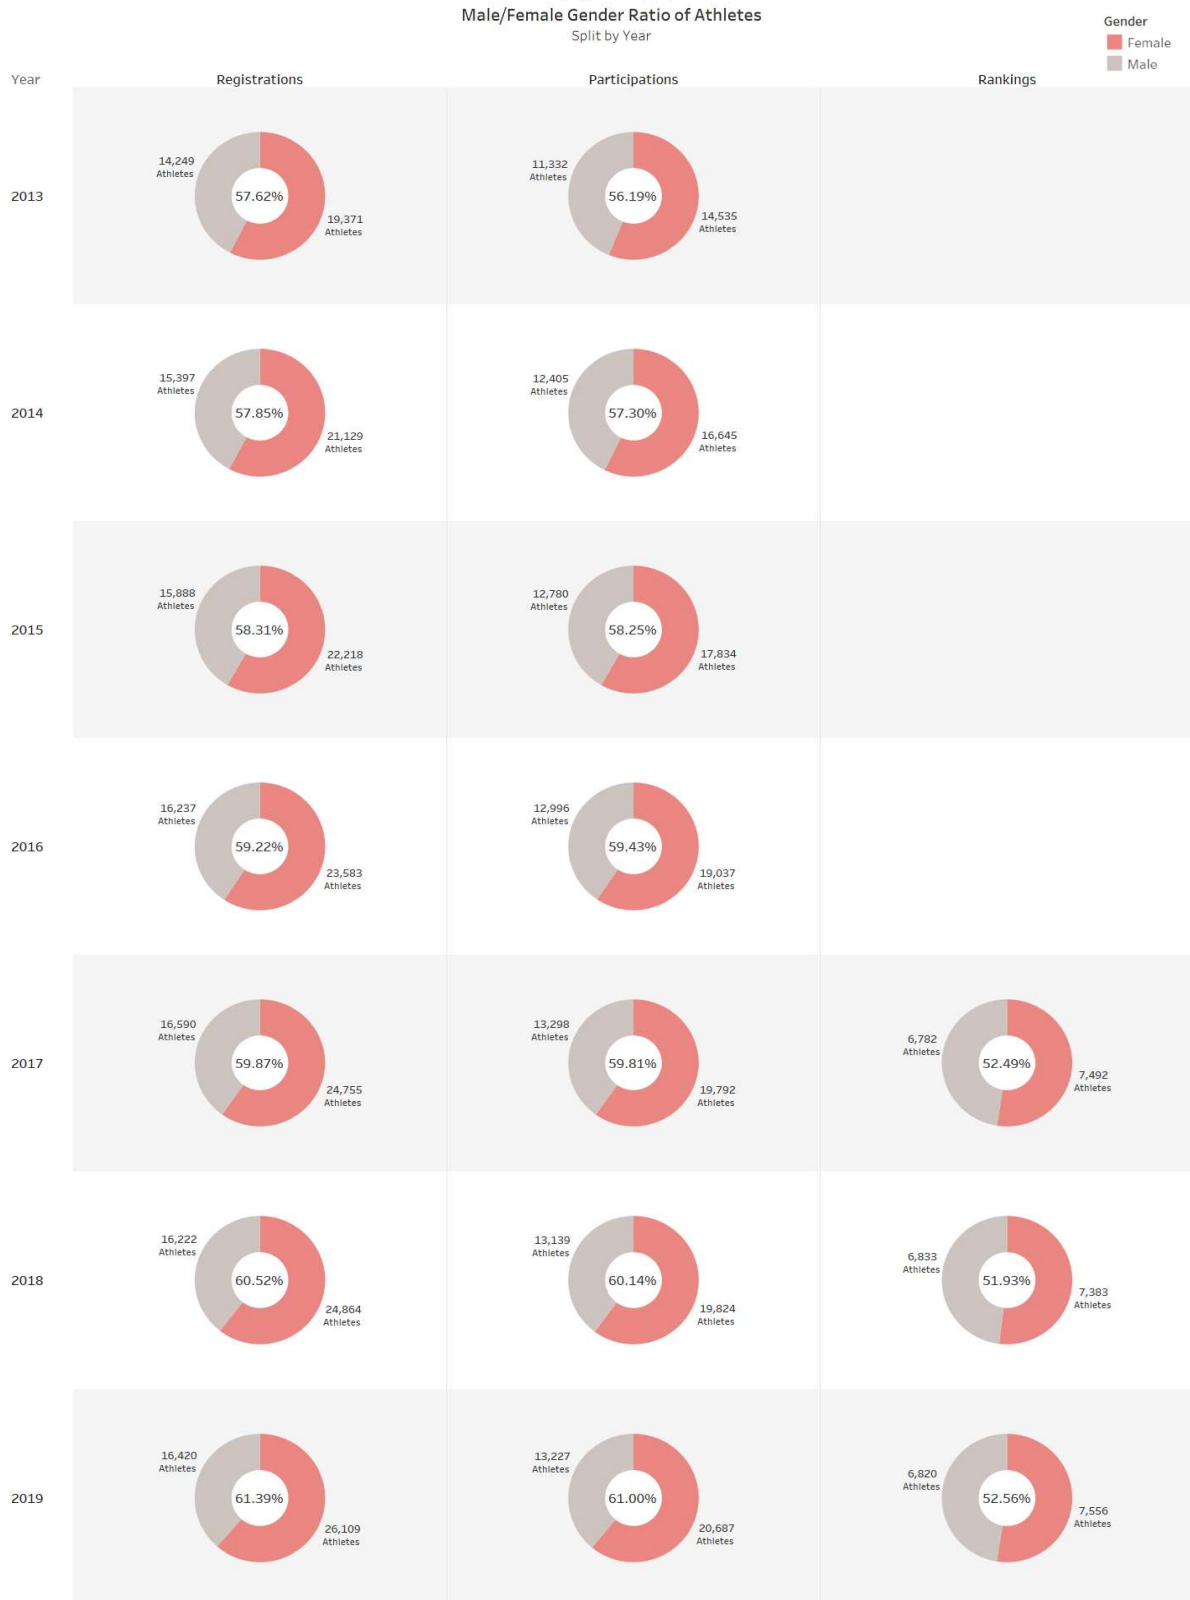

Over the last ten years (2013-2022), the male/female ratio has tended to move away from parity in terms of athlete registrations and participations, rising from around 56% to 63%, an increase of 7% more women. However, the proportion of registered Athletes not taking part in FEI competitions has remained constant, at an average of 25%. In terms of ranked Athletes, this percentage has also grown positively, but to a lesser extent (2%). The rate of female representation in the rankings for all disciplines combined is currently 54%. A closer look at the registration data for 2022 shows that the male/female ratio varies greatly between the FEI Groups for which the athletes compete. The Athletes in FEI Group EEF and FEI Groups IV and IX are predominantly female, unlike the Athletes in Groups V, VI, VII.

Athlete registrations in all disciplines have increased over the years, with the exception of Endurance. Jumping and Driving are the two disciplines that have seen the greatest growth in the number of women, approaching 8,5% for the former and exceeding 10% for the latter. The average age of registered Athletes remains unchanged, 29 years.

In terms of participation, the male/female ratio for Olympic disciplines decreases as the level of the competitions increases. In Driving, the proportion of women goes down as the size of the carriage grows. In 2022, the ratio indeed drops from 59% for the participations in event category single to 12% in event category four-in-hand.

In contrast to the overall slight growth in the percentage of female Athletes ranked, it is clear that the gap between men and women is widening in the top 100 and even more in the top 30 Athletes ranked in most disciplines. It is in the Olympic disciplines that we find the biggest differences. In Jumping as a whole, Female Athletes represent around 1/3 of the ranked Athletes, and even more in recent years. In the top 100, however, this percentage falls considerably, to 16% by 2022, and 6% in the top 30. Eventing follows the same trend. The overall proportion of women, although a majority overall, falls significantly at the top of the rankings, from 72% overall to 53% in the top 30 in 2022. These two disciplines are also those where the difference in average age between men and women is the greatest, at over 5 years. Their average age, as well as that of Endurance riders, is also lower (avg. age : ~ 31-34years) than in the other disciplines (e.g. Dressage avg. age: 41 years), with the exception of Vaulting (avg. age : 25 years).
