Topic: Intravenous Fluids

Dear National Federations,

As you are aware, 5L Intravenous Fluid Bags are not available in Japan. As such, they are being imported from overseas.

Last year I asked you all to pre-order fluids so that I could ensure we had enough in stock within the veterinary clinic.

The quantity of pre-ordered 5L fluid bags has been secured through our international supplier, but due to the very restrictive nature of Japanese government veterinary importation regulations, I have not been able to secure much reserve stock.

Therefore, please be advised that any Team/NF who wish to obtain more fluids than their pre-ordered amount, or if they have brought their own and they run out, it is very likely that the supply will be as 1L bags (and not 5L).

1L bags are readily available in Japan and will be stocked in large quantities within the Tokyo2020 vet clinic.

I sincerely thank you for your cooperation in this matter
