# UPDATE (03.12.2020)

Further to many enquiries we have received regarding decisions you are making whether to move your horses before or after 31<sup>st</sup> December 2020:

We understand some of you may have flexibility on when you make the decision about your horse's travel date and have decided to wait and see if a UK/EU Trade Deal is agreed at the highest level and whether this might allow some deviations from the information we have distributed thus far. Others have earlier deadlines for making decisions regarding date of travel. We cannot anticipate when or if a Trade Deal will be agreed or the impact of a Trade Deal on horse movements, so can perhaps only give some context. **We are strongly advised to plan for the requirements that follow in the slides below.**

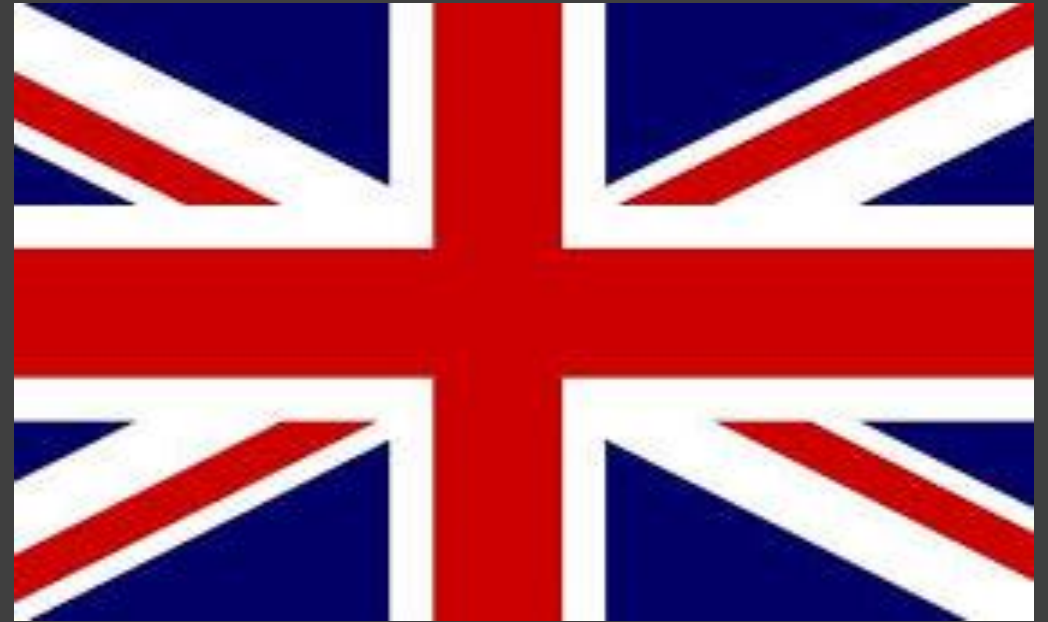

Some context...

- ❖ If there is a Trade Agreement at the highest level between EU and UK then it may be followed by a veterinary sub-agreement. Such an agreement would be the result of a subsequent technical negotiation which would hopefully allow facilitated movement of horses.
- ❖ If there is a Trade Agreement at a high level it is likely that transition rules would be put in place in order to allow time for technical negotiation. In an ideal situation the current system for moving horses would be permitted to continue during the transition period.
- ❖ However this is NOT guaranteed. Your preparations and risk planning may incorporate this possibility but should not in any way focus or depend on it. **We are strongly advised to plan for the requirements that follow in the slides below.**
- ❖ Customs is not expected to have any derogations regardless of a UK/EU Trade Agreement.

# FOALS AT FOOT (03.12.2020)

- ❖ Health Certificates: Need to accompany a foal of any age.
- ❖ Blood work needs to be done for the foal and the foal cannot travel on the mare's blood results.
- ❖ The full 30 day 'kept apart from equidae of different health status' must be completed for the foal. The 90 day residency can be less in the case of younger animals but the 30 day clause cannot be reduced. So the foal must be minimum 30 days age when HC is signed.
- ❖ Similarly for EU recognised studbook foals we anticipate they would need to be minimum 40 days old in order to complete the 40 days veterinary supervision required for entry to EU on temporary health papers. TBC.
- ❖ Microchip and passport are mandatory for travel of the foal to the EU.

# WALK IN MARES (03.12.2020)

❖ Referring to Walk in Mares IRL > UK > IRL:

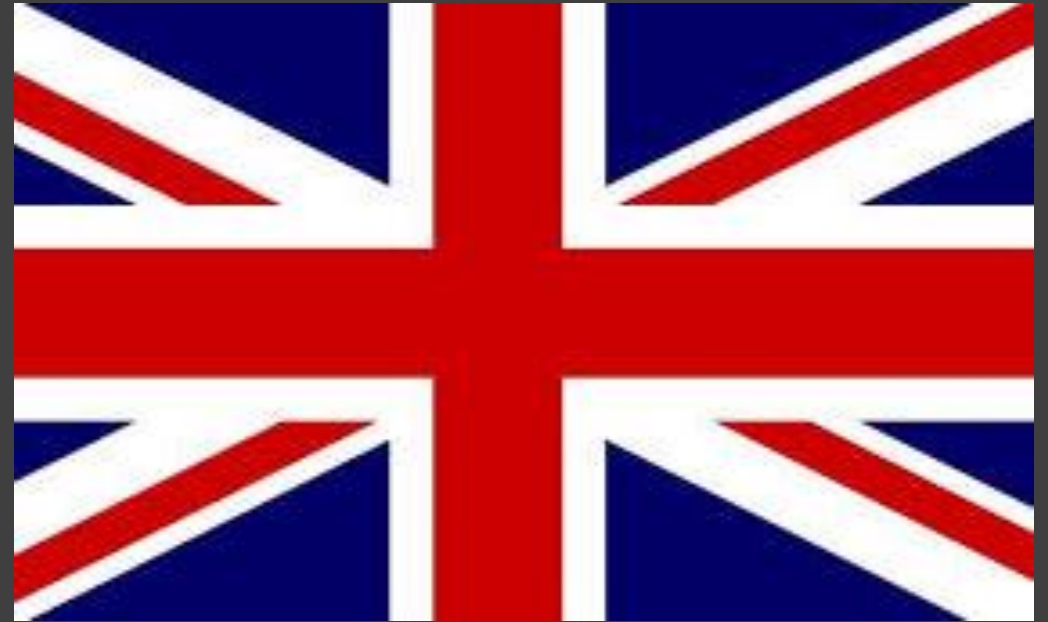

❑ Health conditions for entry IRL > UK:

These are not yet published.

❑ Health conditions for return UK > IRL:

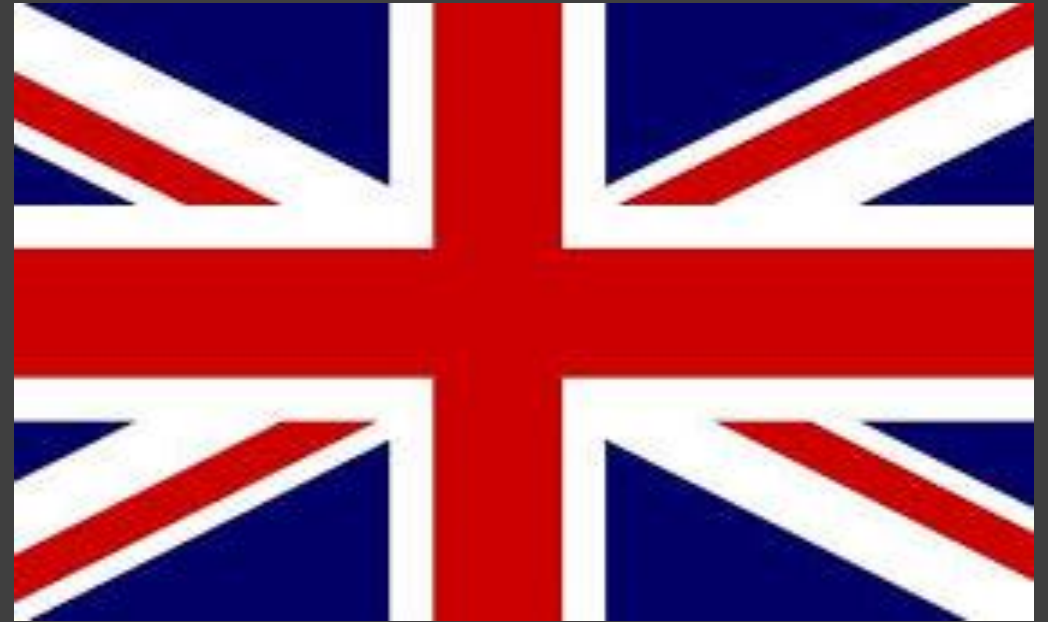

Currently return to IRL would be limited by the need for:

- ❖ Mare to complete 30 days separated from horses of a different health status before travel UK > IRL.
- ❖ Foals at Foot would need to be 30 days old before returning UK > IRL.
- ❖ Updates to be provided as soon as available.

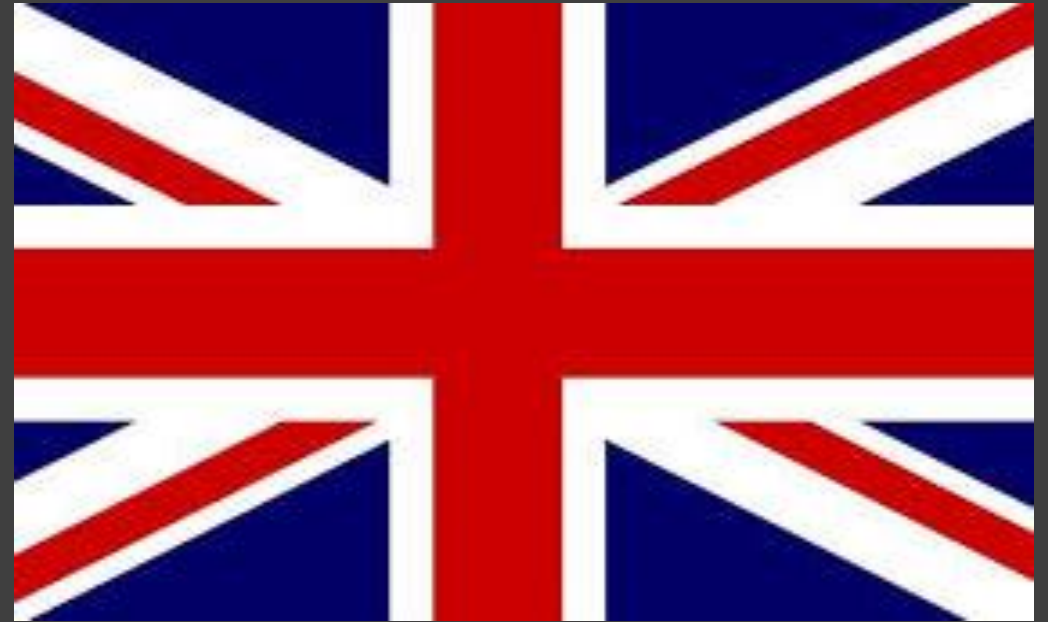

# CURRENT POSITION

- ❖ FROM JANUARY 1<sup>st</sup> 2021 THE TRANSITION PERIOD ENDS AND THE UK WILL NO LONGER BE PART OF THE EU.
- ❖ TRACES/DOCOM & TRI-PARTITE AGREEMENT NO LONGER IN PLACE.
- ❖ IF A DEAL IS REACHED AND TRADE BETWEEN EU AND UK CAN CONTINUE THE UK WILL BE IN GROUP A FROM AN EQUINE HEALTH PERSPECTIVE. THIS IS THE SAME AS AUSTRALIA, NEW ZEALAND, SWITZERLAND AND NORWAY.
- ❖ CHANGES TO HEALTH CERTIFICATION AND HORSEBOX LICENSING WILL COME INTO FORCE IMMEDIATELY AS WELL AS ADDITIONAL CUSTOMS & LOGISTICS PROCEDURES.
- ❖ HEALTH CERTIFICATION TO TRAVEL HORSES FROM UK TO NORTHERN IRELAND AFTER JANUARY 1<sup>st</sup> 2021 CURRENTLY SEEMS TO BE THE SAME AS IT WILL BE FOR UK TO IRELAND (EU PROTOCOLS)

# CURRENT POSITION

- ❖ IF A DEAL IS REACHED BETWEEN EU AND UK: FEI REGISTERED HORSES WILL BE PERMITTED TO ENTER INTO EU ON A TEMPORARY OR PERMANENT BASIS. A DIFFERENT HEALTH CERTIFICATE IS REQUIRED DEPENDING ON THE LENGTH OF STAY IN EUROPE.
- ❖ THE EU MAY NOT AUTOMATICALLY RECOGNISE HORSES REGISTERED WITH NON-EU STUDBOOKS. IN THIS CASE THESE UK STUD BOOK HORSES WOULD BE DEEMED UNREGISTERED UNTIL THE STUDBOOKS BECOME EU RECOGNISED.
- ❖ UNREGISTERED HORSES (HORSES REGISTERED WITH STUDBOOKS NOT RECOGNISED BY THE EU) MAY ONLY ENTER INTO THE EU ON PERMANENT HEALTH PAPERS.
- ❖ PERMANENT ENTRY HAS A LONGER PREPARATION PERIOD (90 DAYS PREPARATION) THAN TEMPORARY ENTRY (40 DAYS PREPARATION).

7.	CHECK EQUINE VIRAL ARTERITIS STATUS OF ANY MALES OVER 180 DAYS OF AGE.	<p>FOR MALES OVER 180 DAYS DO A SERUM VNT TEST TO ESTABLISH THE EVA STATUS.</p> <p>FOR MALES VACCINATED AGAINST EVA CHECK THE VACCINE HISTORY.</p> <p>SHARE DETAILS OF VNT BLOOD RESULTS/VACCINATION HISTORY WITH PEDEN FOR ADVICE WELL AHEAD OF TRAVEL. DO NOT VACCINATE AGAINST EVA WITHOUT OBTAINING ADVICE FROM PEDEN BLOODSTOCK.</p>

**PLEASE BE AWARE THAT IF YOU ARE PLANNING AHEAD FOR POTENTIAL UK/EU MOVEMENTS AND INTENDING TO ASCERTAIN THE EVA STATUS OF STALLIONS/COLTS BY BLOOD TESTING;**

**A POSITIVE EVA SEROLOGY REPORTED FROM THE LAB FOR A STALLION/COLT WILL LEAD TO AUTOMATIC OFFICIAL MOVEMENT RESTRICTIONS BEING PLACED ON THE HORSE BY THE MINISTRY UNTIL A NEGATIVE SEMEN VIRUS ISOLATION TEST IS OBTAINED. THE OWNER SHOULD BE MADE AWARE OF THIS IN ADVANCE OF TESTING & BE PREPARED THAT SHOULD THE HORSE YIELD A POSITIVE EVA BLOOD RESULT AND BE PLACED UNDER RESTRICTIONS THEN A SEMEN SAMPLE WILL BE REQUIRED FROM THE HORSE IN ORDER TO RELEASE THE HORSE FROM RESTRICTIONS. EVA IS AN OFFICIALLY REPORTABLE DISEASE IN STALLIONS/COLTS.**

**IN THE FIRST INSTANCE WE RECOMMEND CHECKING THE EVA VACCINATION HISTORY SO THAT YOUR VET CAN PRE-EMPT A POSITIVE SEROLOGY. IF SEROLOGY IS STILL REQUIRED (DUE TO BROKEN OR UNKNOWN EVA VACCINATION HISTORY OR OTHER) THEN WE RECOMMEND LIAISING WITH THE LAB AND THE MINISTRY IN ADVANCE OF SAMPLE SUBMISSION.**
