

# **PEDEN BLOODSTOCK**

## **GLOBAL EQUINE LOGISTICS**

### **THE EQUESTRIAN EVENTS OF THE TOKYO 2020 OLYMPIC AND PARALYMPIC GAMES JAPAN JULY – SEPTEMBER 2021**

#### **SUMMARY OF SHIPPING REQUIREMENTS FOR PARTICIPATING HORSES**

\*This memo reflects the new Olympic Games and Paralympic Games Dates in 2021  
[April 2021 - All Updates are highlighted in Grey]

#### **Contents**

1. Health Requirements
2. Pre-export Quarantine (PEQ)
3. Quarantine in Aachen
4. Private Quarantine
5. Laboratories
6. Equipment
7. Supplements
8. Veterinary Medicines
9. Feed, Hay & Bedding
10. Horse Flights - 2021
11. Attendants
12. Flight Formalities
13. Airport Parking
14. UK Based Horses
15. Arrival in Tokyo
16. Return from Tokyo
17. Stables in Tokyo
18. Hippobase
19. Hippobase Summary
20. Contacts

**PEDEN BLOODSTOCK**  
GLOBAL EQUINE LOGISTICS

#### **Annex:**

- A. 60 Day Movement Record
- B. Tokyo 2020 Flight, Quarantine, Vaccination & Testing Schedules (including Laboratory Forms)
- C. Dangerous Goods
- D. Veterinary Medicines & Veterinary Devices Request to Ship (attached separately)
- E. Veterinary Declaration (attached separately)
- F. I.V Fluids Information Return (attached separately)
- G. Approved Feeds & Horsehage

## 1. HEALTH REQUIREMENTS

All countries of origin must use the same Export Health Certificate with the following key conditions:

- 60 days pre-export movement record (Annex A)
- 7 days pre-export quarantine (PEQ) (can be done at a quarantine managed by the NOC/NPC/NF or in Aachen which is a Peden managed quarantine facility).
- Influenza vaccination: new primary or booster
- Pre-export testing & Pre-export internal & external parasite treatment.

### 1.1 60 DAY MOVEMENT RECORDS (SEE ANNEX A)

- 60 day movement records (Annex A) must be completed for each horse. Dates stipulated in Annex B.
- These should be stamped/signed by the team/stables/treating vet and endorsed (final page) by the Ministry vet signing the export health paper.
- These 60 day documents:
  - Will need to be uploaded onto Hippobase
  - Must travel to Tokyo with the horse (for horses completing quarantine in Aachen please hand over to Peden on arrival in Aachen)
- The format of the 60 day movement document is provided at Annex A.
- All TRACES documents/health papers issued in this 60 day period must be retained/travel with the horse to Japan.
- Horses may only be resident in the following countries during that 60 day period:  
*Argentina, Australia, Belarus, Canada, Chile, Japan, Saudi Arabia, New Zealand, Norway, Qatar, Singapore, Switzerland, United Arab Emirates, United Kingdom, United States of America and all Member States of European Union (EU).*
- Horses must not be resident on a breeding premises or used for breeding in this 60 day period.
- Please note that any disease incursion onto a premises within the 60 day period will impact the export to Japan of all other Olympic or Paralympic horses on that premises.
- **Biosecurity is vitally important from the beginning of this 60 day period.**

Breeding Premises: Is a premises where a horse has been mated naturally or an AI facility that doesn't comply with 4.6.3 of the OIE code. [https://www.oie.int/index.php?id=169&L=0&htmfile=chapitre\\_general\\_hygiene\\_semen.htm](https://www.oie.int/index.php?id=169&L=0&htmfile=chapitre_general_hygiene_semen.htm)

### 1.2 VACCINATIONS - GENERAL

- No vaccines within 14 days of export.
- It is **STRONGLY** recommended that no vaccinations are administered within approx. 30 days prior to export.
- Please follow the dates in Annex B.

### 1.3 VACCINATIONS - INFLUENZA

- **COMPULSORY** for all horses. Influenza vaccinations **MUST** be up to date according to FEI rules.
- Please ensure that there is a visible FEI primary course and that all subsequent boosters meet FEI requirements. In which case please administer a booster:
  - Influenza Booster will be required within 90 days but not within 14 days of travel.  
*\*We recommend you do not do any earlier than 80 days and no later than 30 days before anticipated travel.*
- If there is no valid primary visible in the passport or if the history is not in accordance with FEI guidelines please administer a new primary course:
  - 2 doses of the same vaccine at a 3 – 6 week interval within 90 days but not within 14 days of travel.  
*\*We recommend you do not do any earlier than 80 days and no later than 30 days before anticipated travel.*
- **Please follow the timelines in Annex B**

### 1.4 VACCINATIONS – JAPANESE ENCEPHALITIS

- Japanese Encephalitis vaccination is **OPTIONAL**.
- Japanese encephalitis (JE) is caused by infection with JE virus. JE virus is transmitted to horses through bites from mosquitoes of the Culex species. The enzootic cycle is from carrier pigs (no symptoms) that get bitten by mosquitoes who then carry the disease. The mosquitoes' natural reservoir are large rice paddies. Therefore, the cases are predominantly found in rural and/or peri-urban area, where horses are kept in proximity to a big swine population and rice paddies.
- A survey confirmed that the pig population within a 5 km radius of EQP (Equestrian Park, Baji Koen) is below 5 individuals and that they are entirely surrounded by residential areas without rice paddies. No pigs were identified within 5km of Sea Forest Park. Furthermore, the Organising Committee will instigate measures to control the mosquito population at the venues before and throughout the events. For example, the stable environment

including drains will be treated periodically with the appropriate insecticides. Electric mosquito traps are located at appropriate locations around the stable area. Therefore, Tokyo2020 biosecurity team's assessment is that there is virtually no risk of the presence of mosquitoes carrying JE at the Olympic venues.

## 1.5 PRE-EXPORT BLOOD TESTS & NASAL SWABS

### \*\*\*FOLLOW THE TIMELINES IN ANNEX B\*\*\*

#### Piroplasmosis Testing – COMPULSORY ALL HORSES

- IFAT for T Equi and B Caballi (piroplasmosis) within 30 days of export.
- Piroplasmosis positive horses may travel to Tokyo for the Games. However please notify Peden immediately so that we can advise MAFF of this positive result and we must also advise the in-contact horses.
- Piroplasmosis testing not required for Australian origin horses.

#### Equine Infectious Anaemia Testing – COMPULSORY ALL HORSES

- Negative Coggins for Equine Infectious Anaemia within 10 days of export.
- A **pre-test** for EIA is also required by Peden. Please submit this to the laboratory at the same time as the piroplasmosis (IFAT) sample.
- A **final export test** for EIA Coggins to be taken within 10 days of export. \*For Aachen horses Peden will arrange this on arrival at pre-export quarantine.

#### Dourine Testing

- Only required if the country where the PEQ is held has not been free of Dourine for 2 years.
- In which case the horse must have been stabled only on premises free of dourine for 6 months AND must be tested for Dourine (CFT) within 30 days of travel to Tokyo with a negative result at serum dilution of 1 in 5.

#### Glanders Testing

- Only required if the country where the PEQ is held has not been free of Glanders for 3 years.
- In which case the horse must have been stabled only on premises free of Glanders for 6 months AND must be tested for Glanders (CFT) within 30 days of travel to Tokyo with a negative result at a serum dilution of 1 in 5.

#### Vesicular Stomatitis

- Only required if the country where the PEQ is held has not been free of Vesicular Stomatitis for 2 years (eg USA).
- In which case the horse must not have been stabled for the 30 days before export on premises within 10 km of an officially confirmed case of VS in the previous 6 months.
- AND a Viral Neutralisation Test (VNT) must be carried out within 10 days of export with negative result at serum dilution of 1 in 32 or an ELISA with negative result.

#### Equine Influenza Swabs

- A sample must be collected from the nasal passage of the horse within 5 days of export and tested by PCR for Influenza A with negative result.
- A positive result in any horse in the quarantine means that none of the horses in the same quarantine are permitted to travel to Tokyo.
- It therefore follows that there is a risk associated with this for all quarantines.
- It is vitally important that all possible actions are taken to mitigate a positive influenza result arising during the quarantine period. There have been recent instances of asymptomatic horses yielding a positive result in quarantine in vaccinated horses.
- Please ensure that the vaccination history in the passport is accurate.
- Please ensure that any Olympic or Paralympic horses are kept in a separate cohort for several weeks prior to entry to quarantine. Processes, personnel, stabling, equipment and transport should be kept separate for all long listed horses including reserves.
- Please ensure that stables at home and at competitions are cleaned and disinfected thoroughly to remove any possibility of exposure of Olympic/Paralympic horses to the influenza virus.
- Please ensure that strict biosecurity is adhered to by stable staff/visiting vets/ farriers/team officials/trainers etc to ensure no indirect exposure of Olympic/Paralympic horses. Strictly enforce this at every opportunity.
- Pay attention to biosecurity in transportation and avoid shared loads in the weeks before entry to PEQ including when delivering horses to quarantine. Ensure all vehicles are thoroughly cleaned and disinfected particularly around the head areas.
- Ensure water buckets/feed buckets/water troughs are not shared between horses in the weeks prior to PEQ entry.
- The risk can only be decreased it cannot be completely removed. The better the biosecurity that is in place in the weeks before the export, the further the risk will be reduced.
- To attempt to further mitigate risks all horses will be pre-tested. However, for these to be useful the biosecurity must be maintained prior to swabbing and between swabbing and entry to PEQ.
- Team vets are strongly recommended to be present at swabbing (including the pre-tests) to ensure that swabs are correctly taken, and that there is no mix up of samples/horses.

**Pre-test 1:** Naso-pharyngeal Swab to be taken and sent to the lab for PCR (according to the dates in Annex B) before entering quarantine. Results must be on hand before horses arrive and unload at quarantine.

**Pre-test 2:** All horses arriving at Aachen will also be tested by Espline/horse side test for influenza prior to being permitted entry to quarantine. We highly recommend that this additional test is undertaken immediately prior to entry to private quarantine.

**Final Test in Quarantine:** Nasal swab must be taken within 5 days of export to Japan. Sent to the lab for PCR for Influenza A.

**\*\*For those undertaking private quarantine please communicate with the laboratory at the very early planning stages to discuss timeframes with them. Forewarn the laboratory of sample arrival dates/numbers and ensure that they can return results before horses enter PEQ (for Pre-test 1) and before the export papers are signed (for the Final test in quarantine). This planning with the laboratory should be completed and agreed months prior to shipping.**

## 1.6 PARASITE TREATMENT

- Internal and External Parasite Treatment is **COMPULSORY FOR ALL HORSES**.
- Within 48 hours before entering PEQ the horse is examined for external parasites by the Ministry vet. This can be done just before entry to quarantine.
- Within 48 hours immediately prior to entering PEQ administer a broad spectrum parasiticide licensed/registered for use on horses, capable of killing ticks and used in accordance with the manufacturer's recommendations.
- Prior to entry to PEQ treat the horse with a broad spectrum anthelmintic licensed/registered for use on horses.
- In summary internal and external parasite treatment must be undertaken within 48 hours prior to entry to PEQ.
- Horses completing PEQ in Aachen will have the external and internal parasite treatment completed in Aachen prior to entry to PEQ.

## 1.7 MICROCHIPS

- All horses **MUST** be microchipped and this number must be entered into their passport.
- Ensure a microchip scanner is carried in the flight bag if the horse's chip cannot be read using a standard scanner.

# 2. PRE-EXPORT QUARANTINE (PEQ)

## 2.1 PEQ DURATION

- Pre-export Quarantine will be 7 full days (i.e. 7 x 24 hour periods).

## 2.2 PEQ LOCATION

- Peden will operate a quarantine at Aachen, Germany for each discipline. Any Olympic or Paralympic horse may join this quarantine. In which case Peden will take care of all formalities. Quarantine has already been pre-booked by the majority of NOC/NPC/NFs. If NOC/NPC/NFs require additional spaces please advise Peden as soon as possible.
- Private quarantines are permitted at other locations. These will be under the direction and management of the NOC/NPC/NF and approved by the local veterinary authority. **Separate communication has been sent (on 8<sup>th</sup> March 2021) to all Federations operating private quarantines.**

## 2.3 PEQ PREMISES APPROVAL

- The premises must be authorised by the veterinary authority as a secure and guaranteed place from an animal health perspective.
- Aachen quarantine will be pre-approved and managed by Peden.
- For those NOC/NPC/NFs undertaking a private quarantine you should already be in communication with your Ministry vet.
- It is the role of the Ministry vet who will sign the export health certificate to pre-approve your quarantine site and procedures.
- This Ministry vet will also confirm your pre-export testing schedule.

## 2.4 PEQ KEY POINTS

- Horses are not permitted to leave quarantine **EXCEPT** eventers who are permitted to gallop twice subject to strict conditions: Ministry vets must ensure that the health status and the biosecurity is not compromised and the horses stay under the same sanitary status during this time.

- Reserve horses are permitted to enter into quarantine, however they must meet the same health requirements as the horses that travel and they must enter before quarantine begins.
- It will not be permitted to unload horses from trucks between departing the quarantine premises and arriving at the airport of departure. The horse must be moved directly from the PEQ to the airport of departure. However, trucks do not need to be officially sealed by the Ministry vet.
- Please note that all feed, hay and shavings used on the horse box for transfer to Liege must originate in the PEQ. Any hay or feed for the flight must originate from the PEQ.

### 3. PRE-EXPORT QUARANTINE (PEQ) IN AACHEN

#### 3.1 AACHEN PEQ BOOKINGS

- Peden will operate the quarantine in Aachen.
- The majority of NOC/NPC/NFs have already booked spaces in the Aachen quarantine.
- Should further NOC/NPC/NFs decide they wish to utilise this option please contact Peden asap.

#### 3.2 AACHEN PEQ TIMEFRAMES

- The quarantine and testing schedule can be found in Annex B.
- Where horses undertake quarantine privately (and not at Aachen) please ensure that all testing timeframes are discussed and confirmed with the Ministry vet who will approve the quarantine and sign the health papers.

#### 3.3 AACHEN PEQ - ARRIVAL

A vet check will take place upon arrival at Aachen including external and internal parasite treatment and a flu swab.

- Horses must arrive in Aachen with the following documentation:
  - FEI Horse Passport.
  - TRACES paper consigned to Aachen Laurensberger Rennverein e.V., Albert-Servais-Allee 50, 52070 Aachen. (Registration: DE00062611). This is not required for German origin horses travelling to Aachen.
  - All health papers issued for your horses in the 60 days before export.
  - Completed 60 day veterinary movement document.
  - Test Results (EIA Coggins pre-test, Piroplasmosis IFAT, Influenza nasal swab PCR)

#### 3.4 AACHEN PEQ - HORSE EQUIPMENT

- Please bring feed and buckets incl. string to hang in Aachen. Hay will be supplied if required - at additional cost.
- All equipment to travel to Tokyo must be brought into the quarantine facility prior to quarantine being initiated. All equipment must arrive in Aachen new or cleaned and disinfected.

#### 3.5 AACHEN PEQ - STABLES & RIDING

- Stables will be bedded on shavings which are included. Please bring mucking out equipment (new or clean & disinfected) for Aachen.
- Reserve horses are permitted to enter quarantine in Aachen but these must be booked in advance.
- Exercising and riding will be permitted every day in the available facilities (with the exception of the main stadium). A timetable will be provided. Access to the quarantine will be strictly limited to those persons listed on HippoBase, and at pre-defined and agreed times.
- Flood lit training will be available in the Deutsche Bank Stadium. Fences will be available for jumping.
- Eventers will be permitted to gallop twice at specified days/times subject to applied biosecurity requirements.
- The gallop will be approximately 3.800 m long with some fences available.
- Covid-19 requirements for Aachen will be communicated to all Federations following further updates from the OC.

#### 3.6 AACHEN PEQ - ACCOMMODATION

- Accommodation for grooms and team members will not be pre-booked by Peden in Aachen.
- Electric hook ups for trucks will be available at Aachen.

#### 3.7 AACHEN PEQ - TRANSFER TO LIEGE

- Peden will arrange for the transfer of all horse equipment from Aachen to Liege.
- It is anticipated that horses will be transferred from Aachen to Liege in their own horseboxes. However Peden can also arrange commercial trucking at a charge of €350 per horse. This information will be captured on Hippobase at a charge of €350 per horse.

## 4. PRIVATE PRE-EXPORT QUARANTINE (PEQ)

Guidance was sent to the relevant Federations on 8<sup>th</sup> March 2021.

## 5. LABORATORIES

- For horses undertaking quarantine in Aachen - ALL samples must be sent to Bose. Submission Forms at Annex B.
- For horses undertaking quarantine at a privately approved facility - Samples must be sent to the laboratory advised by your Ministry vet. **Re-confirm laboratory preference with the government vet issuing your export papers.**
- Eg: Netherlands – Samples must be sent to Leylstad, UK – Samples must be sent to Weybridge  
USA – Samples must be sent to AMES.
- If PEQ will be undertaken in a different country to where the horse normally resides it is likely pre-export samples will need to be sent to the laboratory in which the PEQ is located.

## 6. EQUIPMENT

### 6.1 GENERAL POINTS

- All equipment travelling to Tokyo must be placed in quarantine before quarantine begins. All equipment travelling to Tokyo must be new or cleaned & disinfected.
- The majority of NOC/NPC/NFs have now booked their freight weight requirements with Peden. Any NOC/NPC/NFs who have not done so should please forward their booking form to [atock@peden.de](mailto:atock@peden.de) as soon as possible.
- Please remember no wooden trunks. However mucking out equipment (wooden brooms etc) are permitted if they are new or thoroughly cleaned and disinfected. Small fridges and magnetic blankets are permitted to travel.
- No item of equipment may exceed 1.60 m in height including wheels.
- No dangerous goods may travel on the aircraft, see Annex C.
- Please do not lock trunks as they may be opened at the departure airport and on arrival in Tokyo by the authorities.
- All equipment will be weighed at the airport of departure. Any equipment over and above the booked quantity may not be guaranteed to travel as it will be subject to available aircraft capacity (and additional cost to NOCs/NPCs).

### 6.2 PACKING LISTS

- One packing list should be completed per rider please. The packing list format will be sent to all NOC/NPC/NFs by Peden. This is a comprehensive list of contents per box. Please ensure each box is numbered and that this is reflected on the packing list. All boxes for each rider should be listed on the same packing list.  
NB. One packing list per rider for horse equipment.  
One packing list per discipline or NOC/NPC/NF for feed/horsehage.  
One packing list per discipline or NOC/NPC/NF for veterinary supplies and medicines.  
For any NOC/NPC/NF equipment please complete a separate equipment packing list – one per NOC/NPC/NF.
- Please attach a copy of the rider's packing list to each trunk and ensure the number of the box and the name of the rider is clearly visible.
- This packing list will also be required to be uploaded onto HippoBase before travel.

### 6.3 LABELLING TRUNKS

- All equipment must be labelled as follows:  
**1.** NOC/NPC/NF code   **2.** Name of Responsible Person   **3.** Name of Athlete   **4.** Contact Number  
**5.** Box 'enter number' of 'enter total number' eg Box 2 of 5.

### 6.4 MOBILITY AIDS

- Mobility Aids are permitted to travel. No Lithium batteries permitted. Please check this carefully in advance as the airline will check each one at the time of loading and if there is any doubt the mobility device will unfortunately be removed from the aircraft. Any concerns please contact Peden as soon as possible so that we can assist you.

## 7. SUPPLEMENTS

- Non-veterinary supplements (purchased without prescription/ purchased from the local saddlery) should please be listed on the horse equipment packing list.
- Any supplements that are veterinary products (ie issued by your veterinarian under prescription) must travel in the vet kit (and be listed by the vet on the packing list which must be approved in advance by the Japanese Ministry). Such supplements must not travel with the horse equipment.

## 8. VETERINARY MEDICINES

- Team Veterinarians who have been identified by their NOC/NPC/NF to the Veterinary Service Manager (VSM) are permitted to bring a reasonable amount – with respect to the number of horses in their care and the duration of their stay – of medications approved by the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF), and other non-prohibited nutraceuticals into Japan for the purposes of veterinary treatment of their own team horses. These medications are the responsibility of the Team Veterinarians.

### REQUEST TO SHIP

- The list of veterinary medicines and **Veterinary equipment** Team Vets wish to bring into Japan must be submitted to [hiroko.aida@tokyo2020.jp](mailto:hiroko.aida@tokyo2020.jp) and cc'd to [fiona@peden.co.uk](mailto:fiona@peden.co.uk) before 24th May using Annex D and E.
- Please complete Column A and B only in Annex D. INCLUDE MEDICINES, VET SUPPLEMENTS AND VET EQUIPMENT/DEVICES.
- If a Team vet may be considered for allocation of a seat on the aircraft please ensure a separate Annex D is submitted for their emergency vet kit. They are obliged to travel with an emergency vet kit as the Team vet kit will be in the cargo area of the aircraft and inaccessible during flight.
- For medications available to purchase on the venue please refer to the Vet Services Guide. <https://inside.fei.org/fei/games/olympic/tokyo-2020>

### PERMISSION TO SHIP

- On receipt of Annex D and E MAFF will issue a confirmation sheet listing the approved products and equipment. Only these products are permitted to travel and this must be reflected in the packing list.

### PACKING LISTS FOR VET KITS

- One packing list per discipline or per NF/NOC. Please carefully number the trunks and ensure that these numbers are clearly visible at the airport. This will allow the customs officers to check off contents against packing lists.
- Attach a copy of the completed packing list to the trunk.
- Vets allocated a seat on the horse flight must carry an emergency vet kit with them. Please ensure that a kit list has been submitted for approval to Tokyo Authorities before 24th May (Annex D and E).
- Peden will ensure Fluids are available on the aircraft for emergency use however a full vet kit should be carried. Approval to ship must be applied for the emergency vet kit.

### FLUIDS

- Fluids are only available in Japan in 1litre bags. The OC are pre-ordering 5litre fluid bags for pre-import into Japan.
- Please find updated information in Annex F.
- Please could all NOC/NPC/NF complete and return Annex F to [hiroko.aida@tokyo2020.jp](mailto:hiroko.aida@tokyo2020.jp) before 30.04.2021.

## 9. FEED, HAY & BEDDING

### 9.1 FEED

- Annex G (NOW UPDATED) lists the feeds which have to date been pre-approved for import into Japan on the Tokyo2020 horse flights (page 1 -11)
- Any feed on this list is permitted to import to Japan on the Tokyo2020 horse flights without additional phytosanitary documentation or inspections. Only a Peden packing list is required.
- The JRAF (Japan Racing Association Facilities) will also have feed for purchase on site. Please find the provisional list of feeds available to purchase on the venue in Annex G page 12 (NOW UPDATED). Contact for feeds to be purchased onsite is [tokyo2020feedsandbedding@jra-f.co.jp](mailto:tokyo2020feedsandbedding@jra-f.co.jp)
- Kentucky Equine Research (KER) are now contracted to support JRA with on site feed and bedding requirements.

### 9.2 HORSEHAGE PRODUCTS

- Several Marksway, D&H and Jopack products have been pre-approved for import into Japan on the Tokyo2020 horse flights. These products are listed in Annex G.
- Such products are permitted to import to Japan on the Tokyo2020 horse flights with a Peden packing list only. No additional phytosanitary documentation or inspection is required for these listed products.

### 9.3 HAY

- Hay or haylage cannot be imported into Tokyo.
- Only products listed on page 1 – 11 of Annex G are permitted to import on the Tokyo2020 horse flights.
- Kentucky Equine Research (KER) will assist Federations by providing information regarding hay available for purchase on the venue.

- Product details will be provided to NOC/NPC/NFs to enable purchase for diet transition at home prior to shipping.

## 9.4 BEDDING

- Horses will be stabled on shavings. The first bedding is free of charge (4 bales of Bedmax at Equestrian Park; 3 bales of Bedmax at Sea Forest). Subsequent bales will be charged.
- Straw and paper will also be available. Please note that should paper be required the minimum quantity which can be ordered is 50 bales @ 20kg.
- Bedding preference should be uploaded onto HippoBase.

## 9.5 HAYGAIN

- Only the U.S. version of the steam generator is suitable for use with Japanese electrics and will take a little longer than normal to reach temperature.
- If any NOCs/NPCs need help to provide the correct type of steam generator, they should contact Haygain directly as soon as possible [info@haygain.com](mailto:info@haygain.com)
- Tokyo 2020 need to estimate the number of Haygain machines on site for the electricity supply. All NOC/NPC/NF bringing Haygain to Japan must please notify the OC by email before 30.04.2021: [equestrian@tokyo2020.jp](mailto:equestrian@tokyo2020.jp)

## 10. HORSE FLIGHTS 2021

See Annex B

## 11. ATTENDANTS ON FLIGHTS

### 11.1 AVAILABILITY OF SEATS

- NOC/NPC/NFs will shortly be notified of their seat allocations per flight.
- All attendants are responsible to work as a team on the flight to care for all horses equally.
- Attendants travelling on flights with horses must have Criminal Background Checks dated no earlier than 1<sup>st</sup> October 2020.

### 11.2 ATTENDANTS - HIPPOBASE

- For those NOC/NPC/NFs with allocated seats the following documents must be uploaded onto Hippobase before Definite Entries.
  - Colour Passport copy
  - Tokyo Pre-Validation Card (=Pre-accreditation)
  - Criminal Background Check (dated no earlier than 1<sup>st</sup> October 2020)

### 11.3 VETERINARIANS ON FLIGHTS

- An Emergency Vet Kit should accompany the vet on the flight.
- For vets flying with horses the kit list application must be submitted by May 24<sup>th</sup> (see Section 8).
- Veterinarians should be prepared to attend to any horse on the flight. Please tick the box on HippoBase to confirm this.
- The Emergency Vet kit should be a separate kit to the kit that is for use by the team vet on the Venue as it will be carried on the main deck of the aircraft. The vet kits for the venue will not be accessible during the flight as they are carried in the belly of the aircraft.
- A separate packing list should be completed for the Emergency Vet Kit and this should be uploaded to HippoBase. Deadline to be advised.
- Limited IV fluids will be provided on the flight by Peden for emergency use.

### 11.4 COVID-19 IMPLICATIONS

- Covid-19 related information be distributed in a separate document.

## 12. AIRPORT & FLIGHT FORMALITIES

### 12.1 DOCUMENTATION TO BRING TO LIEGE

- Horse Passport.

- Completed, signed and stamped export health certificate for travel to Tokyo – including 60 day paper.
- Completed signed and stamped TRACES paper to Liege Airport.
- Blood results.
- Swab results.
- All health certificates issued in the 60 days before travel.
- Attendants passport, PVC and Criminal Background Check.

## 12.2 ARRIVAL AT AIRPORTS - LIEGE

- Follow the signs for Cargo Area and Peden/Tokyo2020.
- All horses travelling from private quarantine to Liege will be stabled in Liege at the airport in preparation for the flight. Shavings will be provided.
- All horses travelling from Aachen will deliver directly to the aircraft without stabling at the airport.
- Horses and equipment travelling from private quarantine must arrive in Liege before 1400hrs on the day prior to departure (all flights will depart at 0045 in the morning). i.e. Horses must arrive in Liege minimum 11 hours before the flight departs.
- Equipment will be immediately security screened and palletized so please ensure that you have a small flight bag packed for your horse. You will have no access to your packed equipment after point of arrival at the departure airport until your arrival in the stables in Tokyo.
- Attendants travelling on the horse flights will be required to hand over their suitcases on arrival in Liege.
- Please bring feed/hay and buckets for use in Liege and on the flights. Please ensure you have string for your buckets so that they can be hung inside the jet stalls. Feed and hay for the flight must originate from the PEQ.
- Any hay used in flight must have entered pre-export quarantine at the same time as the horses.
- Should you require accommodation for your any drivers/team members please contact the Park Inn, Liege directly: <http://www.parkinn.com/airport-hotel-liege>
- Should NOC/NPC/NFs wish to have fluids administered to their horses preflight in Liege, and should their own team vet not be present, Peden can request a local vet to attend the airport. Please note the responsible person accompanying the horse/s should have adequate funds available to pay the vet directly for this service. Please notify Peden in advance.

## 12.3 LOADING CONFIGURATION OF HORSES

- All horses will fly in wide stalls.
- All NF/NOC/NPCs should please advise how they would like their horses loaded by entering the information in HippoBase ie which two horses should travel together on the same pallet. Should we not receive this information Peden will allocate horses to pallets. This load plan must be submitted to the airline in advance of the flight and we will not be able to make any changes when loading at the airport. Please complete this information on HippoBase when horses are allocated to a flight.

## 12.4 HAY, BUCKETS & RUGS FOR THE FLIGHT

- Please ensure that horses arrive at the airport with one large haynet for the flight. Additional bales will be placed on the flight.
- All hay brought for the flight MUST have entered quarantine at the same time as the horses.
- You will be required to provide your own buckets for the flight. Peden will provide water containers for the flights ex-Liege. These will be refilled in Dubai. For flights ex-USA and please provide water containers for your horses.
- If your horse is wearing a rug on the aircraft, please ensure that there are NO fillet strings attached to the rug and that it can be easily removed if required. We recommend horses travel without rugs.
- We encourage taping of shoes for the flight. We encourage each horse to travel with a spare set of shoes in their trunks (not in the flight bag).

## 12.5 FLIGHT BAGS

- There will be one small “overnight” bag allowed per horse which should fit in the front of the jet stall. This should contain loading items (bridle, chain, rug, etc.) and feed for the flight only. These items should not be included in the packing lists.
- Peden will provide one tack/flight bag per horse.
- Items travelling in the airstables: prior to the loading of the horses into the airstables, all hand luggage, feed for the flight, hay, buckets, kickpads and any other items due to travel on the main deck will be collected, taken through security and into the warehouse. This will be given back to you once you enter the warehouse with the horses.
- Please ensure that hand luggage, flight bags, buckets, kickpads and haynets are all clearly labelled.

## 12.6 SUPPLEMENTS, FEED & FORAGE FOR CONSUMPTION IN TOKYO

- All Feed and Forage for consumption in Tokyo should arrive at hub airports on plastic pallets. Wooden Pallets are not permitted. It must be packaged separately to supplements, vet products and horse/vet equipment.
- Each Pallet should have a list of contents attached to the outside. Only feed/horsehage products pre-approved for import on the Tokyo2020 horse flights (see items listed page 1 – 11 at Annex G) are permitted to travel on the Tokyo2020 horse flights.
- Label each Bag/Bale with: **1. NOC/NPC/NF name 2. Flight/OP Number 3. Product Manufacturer & Name.**

## 13. AIRPORT PARKING – LIEGE, BELGIUM

- Non secured parking next to the road (not inside the Horse Inn area) is available for a limited number of horse vehicles directly adjacent to the loading area at Liege Airport. This will be allocated on a first come first served basis and cannot be guaranteed. There is a secure parking area ca. 5 km away. Should you require parking there, please see <http://www.vppark.be/tarifs.php>. Charges are approx. 145€ per week. It is not necessary to pre-book.
- Please note that all vehicles will be parked at the owner's risk and neither the Liege Airport authorities nor Peden Bloodstock GmbH/Ltd will be liable for any theft or damage.
- All riders are responsible for the collection of their horses and equipment from Liege. If you are leaving your horsebox in the secure parking area at Liege whilst you are in the Tokyo it is your responsibility to ensure that it is at the Liege Flying Farm before the aircraft lands. There will not be time for any flying attendants to collect their vehicle before the horses are unloaded.

## 14. UK BASED HORSES

### 14.1 FERRY & EUROTUNNEL CROSSINGS

Please contact our Peden UK team ([Fiona@peden.co.uk](mailto:Fiona@peden.co.uk) / [Henry@peden.co.uk](mailto:Henry@peden.co.uk)) who will facilitate bookings for you.

### 14.2 HEALTH CERTIFICATES (UK HORSES)

- Please contact our Peden UK team ([Fiona@peden.co.uk](mailto:Fiona@peden.co.uk) / [Henry@peden.co.uk](mailto:Henry@peden.co.uk)) who will liaise with Defra and your local veterinarian to coordinate the issuance of health certificates for your journey to Tokyo.
- NOCs/NPCs/NFs should please send a consolidated email to [fiona@peden.co.uk](mailto:fiona@peden.co.uk) to inform of UK based horses where assistance will be required for issuance of Health Certs and arrangements for travel from UK to EU.
- All UK horses travelling from private quarantine to Liege, or from UK home stables to Aachen quarantine will need UK - EU health certificates.
- These require a Coggins test within 90 days of export; and additionally for stallions - an EVA test within 21 days of export.
- EVA blood tests can be positive for stallions. In this case negative semen samples would be required. We advise anyone with stallions based in the UK to pre-test for EVA approx 8 weeks before departure. In this case any non-negatives can be resolved.
- Applications for health certification are complex and crossings times are limited.
- There are currently challenges with sending samples to Bose laboratory in Germany. Please liaise with Peden.

### 14.3 ROAD TRANSPORT OF HORSES & EQUIPMENT (UK HORSES)

- Peden can arrange consolidated travel of your horses and/ or equipment to Liege.
- Please contact us directly should you require any assistance in this regard.

## 15. ARRIVAL IN TOKYO

- Horses will be smoothly and swiftly off loaded from the aircraft and transferred directly onto the Japanese Racing Association (JRA) air-conditioned vehicles. A visual check will be undertaken as the horses unload. The horse temperature will be taken using an infrared monitor.
- Horses, equipment, feed and veterinary supplies will travel to the venue in convoy.
- The journey from Haneda will take approx. 45 mins. The journey from Narita will take approx. 1 hour 45 mins.
- Once the horses arrive in the stables an arrival vet check will be undertaken which will meet MAFF and FEI rules. It will be conducted by the FEI Vet delegates or a Permitted Treating Vet appointed by the Vet Delegate.

## 16. RETURN FROM TOKYO

- Peden will prepare all return certification from Tokyo back to the hubs of origin.
- EU horses will be issued onward TRACES certification from Liege to the address entered in Hippobase.
- For horses re-departing the EU (eg travelling on to countries other than EU member states Norway, Switzerland, UK and USA) it will only be possible to issue TRACES certification from Liege to the EU Border of Exit; with the final destination stipulated. Additional certification (other than EU return papers) will not be issued by the Japanese Ministry. Peden will assist with these requests on an individual basis.
- Stabling may be reserved at Liege airport for horses returning from Tokyo. To reserve please tick the box on Hippobase "HorseFlyingDetails" page before Definite Entries deadline.
- All horses returning to USA must undergo 3 days post arrival quarantine.

## 17. STABLES IN TOKYO

### 17.1 GENERAL

- Peden Bloodstock are responsible for the Stable Management in Tokyo.
- Peden will have 2 professional Stable Managers on site for the duration of the horse sojourn in Japan. They will be supported by Tokyo 2020 volunteers. Additional stable managers and Peden staff will be on site once all horses are on the venue to assist with Sea Forest (Eventing cross country) stables and transfer for Eventing cross country.
- Horses will be stabled by NF/NOC/NPC.

### 17.2 STABLE EQUIPMENT

- No mucking out equipment or buckets will be provided in Tokyo.
- No ice machines are provided.
- There is one chest freezer per stable block.
- Additionally each horse will be provided 4kg of crushed ice per day.
- There is air conditioning in the stables.
- No motorized vehicles (except mobility aids) and no bicycles are permitted on Olympic & Paralympic Venues.

**Location of electric point:**

**Electric Point in Barn:**

## 18. HIPPOBASE

### 18.1 LONG LISTED HORSES

- All Long Listed horses must be entered into the horse details page ("CheckIn") on HippoBase before Nominated Entries.
- The full address of the PEQ premises MUST be entered for every long-listed horse. This should be done in the allocated box on the horse details page.
- Only horses which are entered on HippoBase by the Nominated Entries deadline will be included on the import permit.
- The Country of origin/PEQ location (where the certificate will be issued) CANNOT be changed after the Nominated Entries deadline.

### 18.2 DEFINITE ENTRIES

At Definite Entries:

- Allocate horses to flight booking groups ("HorseFlights") on HippoBase. Ensure horse passport copies are uploaded.
- Upload scanned copies of health certificates (both the unsigned version 6 days before export and the signed version issued at the end of quarantine) to the "horseflightdetails" page of Hippobase as soon as they are issued.
- Final Horses should be allocated to a flight on HippoBase.
- Return Address Details should be uploaded onto HippoBase.
- NFs/NOCs/NPCs should confirm on Hippobase whether they require return stabling for their horses in Liege.

### 18.3 PACKING LISTS

- Vet Meds & Vet Equipment packing lists:
  - Currently requested 4 weeks prior to shipping. Date TBC.
  - One per discipline or NOC/NPC/NF.
  - Emergency vet kit list - one per vet allocated a seat on the horseflight.
- Equipment and Feed lists:
  - Currently requested 4 weeks prior to shipping. Date TBC.
  - One packing list per rider for horse equipment.
  - One packing list per discipline or NOC/NPC/NF for feed/horsehage.
  - For any NOC/NPC/NF equipment a separate equipment packing list is required – one per NOC/NPC/NF.

### 18.4 SPECIALIST MOBILITY AIDS

- Mobility aids (Scooters, wheelchairs etc) should be entered onto the horse equipment packing list alongside the other horse equipment and uploaded onto HippoBase.

### 18.5 ATTENDANT DOCUMENTS

- The following documents must be uploaded to Hippobase before Definite Entries.
  - Colour Passport copy
  - Tokyo Pre-Validation Card (=Pre-accreditation)
  - Criminal Background Check (dated no earlier than 1st October 2020)

### 18.6 EQUINE HEALTH CERTIFICATES

- Blood results from pre-export EIA pre-test, Piroplasmosis (& if required Dourine, VS, Glanders) – to be uploaded on Hippobase as soon as on hand from the laboratory. Follow testing timelines in Annex B.
- Influenza pre-test to be uploaded on Hippobase before arriving at quarantine. \*\* horses will not be permitted to unload in Aachen without the influenza result.
- Pre-filled completed unsigned health certificates (page 1 – 4) - to be uploaded 6 days before shipping. Peden will arrange for Aachen horses.
- The stamped and signed certificate (all 10 pages) must be uploaded at least 12 hours before arriving at the airport (should include the latest Influenza result (influenza swab taken within 5 days of export) and EIA (Coggins) result (taken within 10 days of export) (and Vescicular Stomatitis results where required) and the completed and signed 60 day paper. Peden will submit these to Japan Authorities. Peden will arrange for Aachen horses.
- Original Health Papers must travel with the horses to Japan. Peden will collect these at the airport of departure.

## 19.SUMMARY OF HIPPOBASE REQUIREMENTS

- BEFORE NOMINATED ENTRIES
  - Enter Long List of Horses
  - For each Long Listed Horse – Enter PEQ address, Horse Delivery & Collection Details required.
- BEFORE DEFINITE ENTRIES
  - Allocate horse to flight (OG) in “HorseFlights”
  - Enter Return Address Details for each horse
  - Upload Horse Passport – Front Page, Description Page. Silhouette Page, Vaccination page showing booster – ENSURE MICROCHIP NUMBER IS VISIBLE. Vaccination details will need to be entered.
  - For Each Attendant upload colour passport copy, PVC card, Criminal Background Check and confirmation of viewing of Emirates attendant safety video.
- 24<sup>th</sup> MAY 2021 – Send to [hiroko.aida@tokyo2020.jp](mailto:hiroko.aida@tokyo2020.jp) Completed Annex D and E
  - For Each Vet Kit (one per discipline or one per federation)– Submit Annex D and E. Include medications and vet equipment on this list.
  - Flying Vets Only – Submit Annex D and E for Emergency Vet Kit.
- 1 MONTH BEFORE EXPORT (TBC)
  - For Each Long Listed Horse –Upload COMPLETED Equipment Packing List
  - For Each Long Listed horses – complete bedding preference for Tokyo
  - Upload Veterinary packing lists (meds and vet equipment)
- 20 DAYS BEFORE EXPORT (as soon as on hand from lab - follow timelines in Annex B)
  - Blood results from 30 days pre-export onwards (EIA pre-test, Piroplasmosis & if required Dourine, Glanders)

- **BEFORE ARRIVING AT QUARANTINE**
  - Influenza pre-test – to be uploaded before arriving at quarantine. \*\* horses will not be permitted to unload in Aachen without the influenza result.
- **6 DAYS BEFORE SHIPPING**
  - Private Quarantine horses - Pre-filled completed unsigned health certificates - to be uploaded 6 days before shipping Page 1 – 4 only.
- **48 HOURS BEFORE SHIPPING**
  - Attendants travelling with horses – negative COVID test (further details to follow)
- **AT LEAST 12 HOURS BEFORE ARRIVAL OF HORSES AT DEPARTURE AIRPORT**
  - Private Quarantine horses – Upload scanned copy of completed, signed and stamped export health certificate to Tokyo on “horseflightdetails” page + please also upload the 60 day paper and the latest Influenza result (influenza swab taken within 5 days of export) and EIA (Coggins) and Vesicular Stomatitis (if required) taken within 10 days of export.

### INSURANCE AND LIABILITY

Neither the Tokyo2020 Organising Committee nor Peden Bloodstock GmbH/Ltd, accepts any responsibility for any accident or illness that may befall any horse, competitor, groom or any other person. The same applies in case of damage to cars, saddlery, utensils and all other objects (including damage resulting from theft, loss, fire).

Owners/Riders are responsible to ensure that each participating horse is insured for a sufficient amount to cover any eventuality that can occur during or in relation to the Tokyo 2020 Olympic and Paralympic Games (2021), including without limitations, problems occurring during Tokyo 2020 organised transportation between the designated hubs of origin to/from the Tokyo 2020 Venues.

All NOCs/NPCs/NFs are responsible for damages to third parties caused by themselves, their employees, their agents or their horses. They are therefore strongly advised to take out a third party insurance providing full coverage for participation in the Tokyo 2020 Olympic and Paralympic Games (2021) at home and abroad and to keep the policy up to date.

Peden Bloodstock GmbH's liability is limited in accordance with the Allgemeinen Deutschen Spediteurbedingungen – ADSp (German Forwarders' General Terms and Conditions of Trading) latest edition only. Forwarders insurance according to ADSp covered through Asmarit GmbH:

**CERTIFICATION ON MOVEMENT INFORMATION OF THE HORSE DURING  
THE 60 DAYS PRIOR TO ENTRY INTO PRE-EXPORT QUARANTINE**

- (a) During the 60 days immediately preceding export from the country/place of export, this horse has ONLY been in Scheduled Countries.

***Argentina, Australia, Belarus, Canada, Chile, Japan, Saudi Arabia, New Zealand, Norway, Qatar, Singapore, Switzerland, United Arab Emirates, United Kingdom, United States of America and all Member States of European Union (EU).***

- (b) During the 60 days immediately preceding export from the country/place of export, this horse has stayed in or has been imported into the Scheduled Countries/Place for equestrian events or for other purposes as described in the following point (c) and (d).
- (c) During the stay in the corresponding country/place below and after due enquiry,
- (i) the horse had been held in premises, which have remained free from evidence of infectious or contagious disease;
  - (ii) the horse had only stayed in stables that were emptied, thoroughly cleansed and disinfected prior to the entry of the horse; and
  - (iii) the horse had not come into contact with horses of a lower health status, other than when competing in official FEI equestrian competition.
  - (iv) the horse has not been brought into horse breeding premises <sup>(9)</sup> and has not been used for natural mating and artificial insemination except for semen collection at facilities complying with the recommendations in Article 4.5.3. of the OIE Terrestrial Animal Health Code (Edition 2017).
- (d) After due enquiry, during the 60 days immediately preceding export;
- (i) the horse has not been in any country/place, territory or part of a territory, in which AHS has occurred in the last two years, or in which vaccination against this disease has been practiced in the last 12 months;
  - (ii) the horse has not been in any country/place in which Venezuelan equine encephalomyelitis has occurred during the last two years;
  - (iii) the horse has not been in any country/place in which glanders has occurred during the last three years;
  - (iv) The horse was continuously resident on holdings under veterinary supervision<sup>(10)</sup> in which none of the diseases listed below occurred during the previous 90 days.
  - (v) The horse did not exhibit any clinical signs of the disease listed below:

African Horse Sickness (AHS)	Equine Influenza
Venezuelan Equine Encephalomyelitis	Equine Piroplasmiasis
Eastern and Western Equine encephalomyelitis, Japanese encephalitis	Equine Rhinopneumonitis
West Nile Virus	Equine Viral Arteritis
Vesicular Stomatitis	Surra
Glanders	Equine Morbillivirus Pneumonia (Hendra Virus)
Dourine	Nipah Virus Infection
Equine Infectious Anaemia (EIA)	Screwworm (New world and Old world)
Anthrax	Horse Pox
Rabies	Epizootic Lymphangitis
—	Equine Paratyphoid

## TOKYO 2020: HEALTH & QUARANTINE QUICK REFERENCE

**PEDEN BLOODSTOCK**  
GLOBAL EQUINE LOGISTICS

PLEASE NOTE: The timings below may not exactly match the health certificate - eg we ask for no vaccinations within 30 days of travel. The Health certificate states within 14 days of travel. There are reasons for the differences – please follow the direction provided by Peden. Any queries please contact [Fiona@peden.co.uk](mailto:Fiona@peden.co.uk)

<b>MICROCHIPS</b>	All horses must be microchipped.
<b>ESTABLISHING PEQ – 7 DAYS PEQ</b>	<p><b>Federations undertaking Private Quarantine:</b> These NFs received an email from Peden on 08.03.2021 and should now be in contact with the local Ministry Vet. Please agree plans for quarantine and share dates for testing and vaccination. Japan Ministry will not set the quarantine requirements. The veterinarian signing the export papers will do this.</p> <p><b>Federations undertaking Quarantine in Aachen:</b> No Action needed. Peden will arrange all quarantine matters and send individual reminders to NOCs/NPCs/NFs in regard to specific blood testing dates, vaccination dates, quarantine start dates etc.</p>
<b>60 DAY MOVEMENT PAPERS (Annex A)</b>	<p>All horses must have Annex A completed from 60 days before entering PEQ. It can be signed by Team Vet/Stables Vet/Ministry Vet.</p> <p><i>Horses only permitted to be resident in: Argentina, Australia, Canada, Chile, Japan, Saudi Arabia, New Zealand, Norway, Qatar, Singapore, Switzerland, United Arab Emirates, United Kingdom, United States of America and all Member States of European Union (EU). No residency on Breeding Premises.</i></p> <p>Final Page (Page 3) to be signed by the Team Vet and the Ministry Vet signing the Export Papers.</p> <p>60 day papers will need to be uploaded onto Hippobase 12 hours before arrival at the airport of departure. Peden will upload the 60day papers for all Aachen horses.</p>
<b>INFLUENZA VACCINATIONS</b>	<p>Please check vaccination history in the passport is complete (primary and boosters must meet FEI requirements).</p> <p>If vaccination history is complete – please administer influenza booster in timeframes in Annex B. OR</p> <p>If vaccination history is incomplete – please administer a new primary in timeframes in Annex B. (2 doses, same vaccine, 3-6 week interval)</p>
<b>PRE-EXPORT BLOODS</b>	<p>Please complete blood testing in line with Annex B.</p> <p>Federations undertaking Private Quarantine – please agree every date with your Ministry Vet signing the export papers asap.</p> <p>Federations undertaking Quarantine in Aachen – Please follow dates in Annex B.</p> <p>All Horses: EIA (Coggins) and Piro (IFAT) -within 30 days of shipping. **Piro positive horses – are permitted to travel. Please notify Peden.</p> <p>Final EIA within 10 days of shipping – advise do before entering PEQ. Peden will arrange for Aachen horses on arrival at PEQ.</p> <p>Countries not free of Dourine - Dourine CFT within 30 days of shipping</p> <p>Countries not free of Vesicular Stomatitis - VS VNT within 10 days of shipping</p> <p>UK based stallions – EVA (VNT) within 21 days of shipping. Pre-testing should be done 8 weeks earlier. Any positive- contact Peden asap.</p>
<b>EQUINE INFLUENZA SWABS</b>	<p>Pre-test Equine Influenza naso pharyngeal PCR within approx 72 hours of entry to PEQ. Timelines may need to vary depending on lab processing times. Follow dates in Annex B.</p> <p>Horse-side test eg Espline or Veritor at entry to PEQ is recommended.</p> <p>Within 5 days of export – Equine Influenza PCR.</p> <p>**Remember highest Biosecurity and do no mix cohort groups in the weeks before entering quarantine– see page 3 of memo.</p>
<b>PARASITE TREATMENT</b>	Internal and External Parasite Treatment within 48 hours of entering PEQ.
<b>HIPPOBASE</b>	<p>EIA, Piroplasmiosis, Dourine (if required), VS (if required) blood results to be uploaded as soon as on hand.</p> <p>Aachen Quarantine horses – Pre-entry Equine Influenza Naso-Pharyngeal Swab PCR pre-test to be uploaded before arrival at quarantine.</p> <p>Private Quarantine horses - 6 days before export -Page 1-4 of the Health cert to be completed (not signed) and uploaded.</p> <p>Private Quarantine horses - Within 12 hours before arriving at airport – upload final signed Health Certificate, Final Flu Result, Coggins, 60 day paper (and VS result if required).</p>

## **ANNEX C – DANGEROUS GOODS**

### **What are dangerous goods?**

Dangerous goods are articles and substances which are capable of posing a significant risk to safety when transported by air. They may be corrosive, flammable, explosive, oxidizing or reactive with water.

Class	Examples
EXPLOSIVES:	Fireworks, flares, toy gun caps.
COMPRESSED SUBSTANCE:	Gas cylinders, aerosols (other than medicines/toiletries).
FLAMMABLE SUBSTANCE:	Lighter fuel, paints, thinners, firelighters, cigarette lighters containing unabsorbed lighter fuel.
OXIDIZERS:	Some bleaching powders, acids, chemicals.
ORGANIC PEROXIDES:	Hair or textile dyes, fibreglass repair kits, certain adhesives.
POISONS:	Arsenic, cyanide, weedkillers.
IRRITATING SUBSTANCES:	Tear gas devices such as mace, pepper sprays.
INFECTIOUS SUBSTANCES:	Biological products and/or diagnostic specimens containing pathogens.
RADIOACTIVE MATERIALS:	Medical or research samples which contain radioactive sources.
CORROSIVES:	Acids, alkalis, wet cell batteries, caustic soda, mercury.
MAGNETISED MATERIALS:	Magnetrons and anything containing strong magnets.
LITHIUM BATTERIES:	Spare Lithium ion batteries and cells with a Watt hour rating greater than 160Wh, are not permitted on an aircraft under any circumstances.

### **Why are you not allowed to take them?**

Due to their properties and their potential for injury and destruction it is illegal to take dangerous goods without special notification.

Expert declaration, classification, packing, marking, labelling and documentation are required.

### **What do you need to do if you would like to take goods classified as dangerous?**

Should you intend to take dangerous goods please contact us and we can verify additional charges and options.

### **What happens if you take dangerous goods without notification?**

The agent and airport or government officials may inspect and/or search your baggage with or without your presence. Any dangerous goods not declared will be removed from the trunks and either returned with the sender or destroyed at the airport. IF YOU TAKE DANGEROUS GOODS ON BOARD, EVEN INADVERTENTLY, YOU MAY BE LIABLE TO PROSECUTION AND A JAIL TERM. Strict and severe penalties apply.
