The above table will be effective for events as of 1 January 2024 - Draft schedule will only be accepted with EUROS or US-DOLLARS

EUROS have to be used in all European countries and have to be included in the draft schedule

US DOLLARS have to be used for the rest of the world and have to be included in the draft schedule

In case of **payment** of the prize money in a different currency, the effective bank exchange rate of the date of approval of the draft schedule by the FEI will be used.

In September 2024 it will be updated using average yearly rate as follows:

A new rate will be calculated between EUR and USD by using the effective month end rate of each month from August 2023 through July 2024 and averaging it over the 12 months period,

If the new average is 5% higher or lower than the rate in effect, the PM table will be adapted for the following year to the new average

If the variation is smaller than 5%, the rate will remain the same and PM will not be adjusted accordingly for the following year

The process will be done every year in August, for the first time in August 2024 for 2025 once approved through due process at the FEI.
