FEI CODE OF CONDUCT FOR THE WELFARE OF THE HORSE

The FEI requires all those involved in international equestrian sport to adhere to the FEI's Code of Conduct and to acknowledge and accept that at all times the welfare of the Horse must be paramount and must never be subordinated to competitive or commercial influences.

1. At all stages during the preparation and training of competition Horses, welfare must take precedence over all other demands.

a) Good Horses management

Stabling, feeding and training must be compatible with good Horses management and must not compromise welfare. Any practices which could cause physical or mental suffering, in or out of Competition, will not be tolerated.

b) Training methods

Horses must only undergo training that matches their physical capabilities and level of maturity for their respective disciplines. They must not be subjected to any training methods which are abusive or cause fear or for which they have not been properly prepared.

c) Farriery and tack

Foot care and shoeing must be of a high standard. Tack must be designed and fitted to avoid the risk of pain or injury.

d) Transport

During transportation, Horses must be fully protected against injuries and other health risks. Vehicles must be safe, well ventilated, maintained to a high standard, disinfected regularly and driven by competent staff. Competent handlers must always be available to manage the Horses.

e) Transit

All journeys must be planned carefully, and Horses allowed regular rest periods with access to food and water in line with current FEI guidelines.

2. Horses and competitors must be fit, competent and in good health before they are allowed to compete.

a) Fitness and competence

Participation in competition must be restricted to fit horses and competitors of proven competence.

b) Health status

No Horse showing symptoms of disease, lameness or other significant ailments or pre-existing clinical conditions should compete or continue to compete when to do so would compromise its welfare. Veterinary advice must be sought whenever there is any doubt.

c) Doping and Medication

Abuse of doping and medication is a serious welfare issue and will not be tolerated. After any veterinary treatment, sufficient time must be allowed for full recovery before competition.

d) Surgical procedures

Any surgical procedures that threaten a competing horse's welfare or the safety of other horses and/or athletes must not be allowed.

e) Pregnant/recently foaled mares

Mares must not compete after their fourth month of pregnancy or with foal at foot.

f) Misuse of aids

Abuse of a Horse using natural riding aids or artificial aids (e.g. whips, spurs, etc.) will not be tolerated.

3. Events must not prejudice horse welfare.

a) Competition areas

Horses must only be trained and compete on suitable and safe surfaces. All obstacles must be designed with the safety of the Horse in mind.

b) Ground surfaces

All ground surfaces on which Horses walk, train or compete must be designed and maintained to reduce factors that could lead to injuries. Particular attention must be paid to the preparation, composition and upkeep of surfaces.

c) Extreme weather

Competitions must not take place in extreme weather conditions if the welfare or safety of the Horse may be compromised. Provision must be made for cooling Horses quickly after competing in hot or humid conditions.

d) Stabling at Events

Stables must be safe, hygienic, comfortable, well ventilated and of sufficient size for the type and disposition of the Horse. Clean, good quality and appropriate feed and bedding, fresh drinking water, and washing-down water must always be available.

e) Fitness to travel

After Competition, a Horse must be fit to travel in accordance with the FEI's guidelines.

4. Every effort must be made to ensure that Horses receive proper attention after they have competed and that they are treated humanely when their competition careers are over.

a) Veterinary treatment

Veterinary expertise must always be available at an event. If a horse is injured or exhausted during a competition, the athlete must dismount and a veterinarian must check the horse.

b) Referral centres

Wherever necessary, the Horse should be collected by ambulance and transported to the nearest relevant treatment centre for further assessment and therapy. Injured Horses must be given full supportive treatment before transport.

c) Competition injuries

The incidence of injuries sustained in Competition should be monitored. Ground surface conditions, frequency of Competitions and any other risk factors should be examined carefully to indicate ways to minimise injuries.

d) Euthanasia

If injuries are sufficiently severe the Horse may need to be euthanized by a veterinarian as soon as possible on humane grounds and with the sole aim of minimising suffering.

e) Retirement

Every effort should be made to ensure that Horses are treated sympathetically and humanely when they retire from Competition.

5. The FEI urges all those involved in equestrian sport to attain the highest possible levels of education in their areas of expertise relevant to the care and management of the Competition Horse.

This Code of Conduct for the Welfare of the Horse may be modified from time to time and the views of all are welcomed. Particular attention will be paid to new research findings and the FEI encourages further funding and support for welfare studies.

The Code is available on the FEI's website: www.fei.org

The starting order of the teams in the first round is established according to a draw. As this is a Continental Team competition format, the order of starting in each team will be decided by the Chefs d'Equipe.

The starting order of the teams in the second round is according to the reverse order of the total penalties incurred by the three (3) best competitors in each team in the first round. Teams with equality of penalties will retain the starting order of the first round.

The order of starting in the possible jump-off will be the same as in the second round. If more than one jump-off is required to determine medal placing, the jump-off for third place will take place before the jump-off for first and second place. Teams retain the same order of starting as the second round.

Classification

The team classification is decided by adding the penalties incurred by the best three (3) competitors of each team in each of the two (2) rounds. In the case of equality of penalties between the teams for first, second and/or third place, a jump-off against the clock is compulsory in which all team competitors participate. The score in the jump-off is obtained by adding the penalties incurred by the three (3) best competitors in each team, but in the event of further equality of penalties, the times of these three (3) competitors in the jump-off added together will decide the winning team as well as those placed second or third. Teams with equality of total penalties for other places are placed equal.

Obstacles and other technical requirements

Number of Obstacles: twelve (12)

Min/Max length of the course: 500m/600m

Height: Maximum 120cm Spread: Maximum 130cm Speed: 350 m/min

All competitors participate in Round A. All competitors who complete Round A go forward to Round B. The penalties in the two rounds are added. The competitors will be invited to inspect the course of Round B.

Starting order

The starting order for Round A is established according to a draw.

The starting order for Round B will follow the reverse order of the penalties incurred in Round A. The competitor with the greatest number of penalties will start first; the competitor with the least penalties will start last. Competitors with equality of penalties retain the same starting order as in Round A.

The order of starting in the possible jump-off will be the same as in Round B.

Classification

The Individual classification is determined for each competitor by the addition of penalties incurred in Rounds A and B. In case of equality of penalties for first, second and/or third place, a jump-off against the clock is compulsory. If more than one jump-off is required to determine medal placing, the jump-off for the third place will take place before the jump-off for the first and second place. In case of equality of penalties and time for any of the medal placing after the first jump-off, there is a second jump-off over the same course. In case of equality of penalties and time after the second jump-off, the competitors concerned are placed equal. Athletes not participating in the jump-off will be placed according to aggregate Penalties over both rounds and the time incurred in the second round.

Obstacles and other technical requirements

CHAPTER III - STABLES, SERVICES AND TRAINING FACILITIES

Article 22 - INTRODUCTION

The Youth Olympic Games bring together the best qualified young competitors from all over the world to compete for the most coveted award in the Youth's equestrian sports. It is therefore most important that the accommodation, health and feeding facilities for horses, grooms and competitors and the facilities for training and practice should be satisfactory in every respect. The following guidelines/directives are designed to help Organising Committees to provide for the needs of the horses, grooms, competitors and Team Officials.

Article 23 - STABLES

23.1 Provision of suitable stables with adequate lighting and ventilation (60 m³ air space for each horse). Loose boxes must be of at least nine (9) square metres. They should be disinfected before arrival and after departure of the horses.

Preferably the stable design should include a roof some distance above the stalls, reflecting heat and allowing airflow over the stabled boxes or the stables should be air-conditioned.

23.2 Each team must be provided with one (1) tack room (six (6) tack rooms in total).

23.3 Each stable block will require:

23.3.1 A supply of drinking water and drinking buckets, at least one outlet per 10 boxes;

23.3.2 Hot water, cold water hoses and ice readily available;

23.3.3 A regular routine for the collection and disposal of used bedding and manure;

23.3.4 A supply of straw and shavings for bedding material;

23.3.5 Fire precautions and a plan for emergencies, (it is important to keep passage ways free of obstructing material/tack in case of emergencies);

23.3.6 A security system designed to keep all unauthorised persons out of the stable areas (refer to Veterinary Regulations);

23.3.7 Tying up facilities in the stables and the passage ways;

23.3.8 At least one electrical power point for each team, out of reach of the horses;

23.3.9 A restroom for grooms and competitors in the stable block plus a room for the team officials in the stable area;

23.3.10 Vector and insect control (i.e. screening for insect control if required, sand around stables for tick control, if required).

Article 24 - CENTRAL SERVICES

24.1 All commonly used feeds should be available including hay, bran, oats, barley, sweet feed, pellets or cubes, corn, linseed and carrots, certified free of prohibited substances.

24.6 Suitable facilities including not less than four (4) boxes must be provided for injured horses and horses needing veterinary attention. These can be included in a temporary structure located in large air-conditioned tent and an experienced veterinary team to provide 24 hour emergency veterinary treatment and possible surgical procedures. A means of access suitable in all weather conditions for horse trailers is necessary, power, water supply and sewer connection. A referral surgical equine clinic in the vicinity is desirable. Details on the design and the required standard of veterinary facilities can be obtained from the FEI Veterinary Department and they must be agreed well in advance with the FEI Veterinary Committee.

24.7 All appointed Veterinary Officials must be in possession of the FEI veterinarian ID card as required by the Veterinary Regulations.

24.8 Not less than four (4) boxes must be provided for the Horse Medication Control.

13. For team sports, the number of teams shall not exceed twelve teams for each gender and not be less than eight teams, unless the IOC Executive Board decides otherwise.

14. In order to obtain an equitable breakdown in the number of substitutes in certain sports, both individual and team, and taking into account the fact that in certain other sports a single entry per event and per country is allowed without any substitute, the IOC Executive Board, following consultation with the IFs concerned, may increase or reduce the number of substitutes.
