

ROYAL SPANISH EQUESTRIAN FEDERATION

EVENTING TECHNICAL DEPT

DIRECTION Madrid, 10 mars 2016

Once we have studied the Eventing document, I would like to make some comments in reference to the two proposals stated in the document OLYMPIC COMPETITION FORMAT to change the scoring system; "Positive Scoring".

- Firstly, congratulations for removing the coefficient of 1.5 in the Dressage Competition, proposed by this NF.
- We also agree everything in which it concerns the Dressage and Jumping Competitions as well as the formats of the different competitions levels.
- We think the proposal "B", which gives 100 points per competition and then subtracts the penalties of each one (XC and SJ), is as complicated as the current used one. Lots of arithmetic calculations are required.
- in reference to the point "A" we think it is logic but difficult to understand too, although we support the penalties for those riders who do not finish the competitions when a team.

For all previously presented, from this NF we would like to propose a clearer punctuation system and based on the "CLEAR ROUND", already known by all of us.

PROPOSAL OF ESP NF:

The equestrian fans, even the non usual viewer, understand "CLEAR ROUND", in either case, jumping or cross. In other words, "CLEAR ROUND", and keeping on the penalties or negative results is appropriated, applying it in the following way, especially in the Dressage competition:

- The Dressage winner will be given 0 point; the second placed rider will have the difference in points with respect to the first one, and so on.
- The XC competition will be scored such as in the current penalty system.
- The SJ competition will be scored as currently.
- EXAMPLE WITH THE THREE FIRST PLACED RIDERS IN DRESSAGE COMPETITION.

RIDER	% DRESSAGE	PTOS CLAS	XC
1	70	0
2	68.4	1.6
3	68	2.00

We think this is simple and easy to understand.
