FEED & STABLE SUPPLIES

August 2023

Horse Feed and Stable Equipment

Included in the \$125 daily boarding fee, PAEC will be providing each horse and groom with the following:

- Havens Feed
- Cavalor Feed
- Timothy Hay (Imported from USA - Premium cut)
- Alfalfa Hay (Local hay – Premium quality)
- Flat-Back Water Buckets (2 per horse)
- Rubber Feeders (1 per horse)
- Plastic Wheelie Bins
- Pitchforks
- Ice
- Shavings
- Brooms
- Additional feed is available ordering 48h in advance. Including but not limited to rolled oats, alfalfa cubes, bran, etc.

Feedmillers Since 1845

HAVENS Horsefeed is the leading brand in equine nutrition and horsefeed in northern Europe. The company was founded in 1845 and ever since HAVENS has been continuously developing and improving its feed products. Today, we proudly present a complete and versatile range of pellets, mixes and mueslis. These products are available in more than 50 countries worldwide.

All HAVENS horsefeed-products are guaranteed 100% natural (100% vegetable) and they do not contain any ingredients of animal origin. The feed-products are composed of high-quality ingredients in fully balanced formulas and packed in paper bags - 20 or 25 kg (44 - 55 lb).

At HAVENS, we just have one goal: to provide the best possible nutrition for your horse or pony. With quality feeds, formulated to match all nutritional requirements; from breeding to leisure riding, racing or top-level sports.

We provide the best horse feed in America. Our feeds are designed for high performance, dressage, show-jumping, endurance, and leisure horses.

All our feeds are backed by HAVENS-research, combined with our over 150 years of experience. They are produced in accordance with international standards in one of Europe's most modern production facilities on the Meuse river in the South of the Netherlands.

Golden Results

The high quality of HAVENS feed has proven itself in practice. HAVENS Horsefeed was the feed supplier of the three gold-winning jumping horses (Egano, Ratina Z and Top Gun) at the Olympic Games in Barcelona 1992. In 2000, Jeroen Dubbeldam won individual gold at the Olympic Games in Sydney and he furthermore won double gold at WEG 2014 and also double gold at the European Championships at Aachen 2015. HAVENS was yet again the feed supplier of the "golden" jumping horses during the WEG 1996. HAVENS clients have also won numerous prizes and medals at various other championships and competitions.

HAVENS is the official supplier of some of the world's most prestigious equestrian events: the WORLD EQUESTRIAN FESTIVAL CHIO Aachen (Germany) This is Europe's largest equestrian tournament for jumping, dressage and driving where also the yearly HAVENS Grand-Prix Dressage-prize takes place.

During the WEG 2006 and European Championships 2015 (both in Aachen), HAVENS was announced official supplier of all participating horses. Again with golden results: the Dutch showjumping team won gold in 2006. And Jeroen Dubbeldam made history by winning 2 Gold Medals in 2015 with his horse Zenith!

Draversbrok

DraversBrok is one of the oldest HAVENS products and the number one bestselling feed.

It is a fully balanced sport- and performance pellets (7 mm), composed of 100% natural and exclusive ingredients such as cereals (oats, barley, corn, wheat), alfalfa and linseed oil. It ensures an optimal condition and shiny appearance of your horse or pony.

DraversBrok is – due to its high energy level – very suitable for horses and ponies in medium to heavy work.

Cool Mix

Cool-Mix is a specialty feed with easy digestible proteins from alfalfa and with extra spelt wheat. This healthy muesli has a low and slow-releasing energy content. For this reason, it is named "Cool-Mix". The Cool-Mix is very suitable for all ponies, recreation horses and horses at rest. Helps nervous horses.

The Cool-Mix contains a high level of Beta-Carotene (from alfalfa) and also many micronized cereals (including heat-treated wheat, corn and barley flakes). The high content of natural spelt wheat stimulates the digestion and maintains calmness. Additionally, linseed oil is added to the muesli.

Gastro Plus

Havens has formulated a new unique feed for all horses and ponies to help them with digestive problems or stomach ulcers.

Blended with a special cocktail of sodium bicarbonate, calcium carbonate, magnesium and additional probiotics to soothe the stomach and neutralise excess acid. Gastro+ is a horse feed with a high specification of amino-acids, vitamins (i.a. 400mg Vit.E), and trace elements; providing your (sport)horse with all nutrients it needs.

Low starch content in combination with a high content of alfalfa, promoting the chewing and saliva production. Alfalfa and saliva are both proven to be a natural buffer to acidity in the digestive tract. Extra oil with an optimal Omega 6-3 fatty acid ratio that supports ulcer healing. Also, it provides slow releasing energy to support optimal performance.

44lb Bag

Feeding Gastro+ will only lead to optimal results if the entire feed management is optimized. Concentrates will only come to their justice when a horse has access to sufficient fibres.

It is therefore important to supply unlimited roughage alongside Gastro+. This does not result in horses with bloated stomachs, because Gastro+ optimizes the gastro-intestinal digestion. The ration helps digestive track and as a result all the available energy can be fully used to deliver performance.

For what cavalry?

Ambition drives us forward and makes us grow. All of us. At Cavalor, we challenge ourselves to acquire new knowledge and constantly seek to improve. This is how we develop our products; each of them represents a single, rational view of equine nutrition and care – fueled by scientific research and driven by the health and needs of the horse.

Every horse is different. Each rider is unique. And their ambitions are just as important. We are here for all equestrian sports enthusiasts. We are Cavalor, we are part of your team. We are here to realize your ambitions.

HEALTHY GUT, HEALTHY HORSE

TRUE HEALTH COMES FROM WITHIN

KEEP YOUR HORSE HEALTHY
WITH BALANCED BOWEL
FUNCTION

Long fibre mix

Low In sugar and starch

Extra protection of the
Intestinal function and
provides natural immunity

www.mycavalor.com

Usage :
(Sport)Horses with sensitive digestive tract or susceptible to metabolic diseases (insulin resistance, laminitis, PSSM, EMS,...)
(Sport)Horses recovering from illness/surgery or after long-term medication
Sporthorses after an intensive sport season

High-fibre muesli for a balanced intestinal function

Unique blend of high quality and easily digestible fibres: Alfalfa(alfalfa)-pellets, alfalfa stems 8%, teffpellets, beet pulp.

More fibre = better digestion + avoid gastro-intestinal complaints.

Enriched with herbs, pro- and prebiotics

Supports the intestinal flora and restores general intestinal health

Strengthens natural immunity = better skin/coat condition, better performance and better protection

Low in starch 5% and sugar 3%

Maintains low blood glucose and insulin levels, therefore it's safe for horses prone to metabolic diseases.

Energy from fat and fibre

Slow energy release - **long-lasting energy**

High-quality fat - easy to digest

Shavings

The product we offer is shavings of “Pino Insigne” wood that are totally dry, clean and free of any foreign element, packed in a duly sealed pressed bale format. Our product is offered in the following format:

- big bale
- Volume: 90 Liters approx. pressed, equivalent to 285 liters pre-pressed.
- Dimensions: 39x32x76 cm.
- Weight: 19 kg.
- Characteristics

Premium Shaving

Our shavings come from renowned sawmills in the Maule region, with known traceability of the entire production process and free of chemical processes, obtaining a pure and high-quality product.

Hygienic Solution

Our shaving is a product with great absorption capacity that will help keep your animals or pets in a dry and clean environment.

Coming from a resinous pulp tree (Pino Insigne), our shavings inhibit bacterial proliferation.
